

Install GitRepository on a Domain Forge.

Git is a version control system that allows developers to track changes to source code and collaborate with others on software projects. If you have a domain and want to host a Git repository on it

Follow the steps below to Install GitRepository on a Domain.

Navigate to the Home Page of Forge

([Use this link to view How to Navigate](#)).

Install GitRepository on a Domain:

([Use this link to view Install GitRepository on a Domain](#)).
