

# How to Change Manage Redis Password through the cloudpanzer mobile app?

If you are using Redis in a production environment, securing your Redis instance by setting a password is essential. This will prevent unauthorized access to your Redis data.

## Prerequisites :

You must have an Active Server. You can jump to the tutorial section if the above conditions are proper, Or first follow the links below to set up the prerequisites.

## How to install a Server

## Tutorial :

**You can watch the Video or Continue reading the post.**
