

How to Change TLS Minimum Version ?

Transport Layer Security (TLS) is a cryptographic protocol that provides secure communication over networks, including the internet. It is used to encrypt data transmission and authenticate the identity of the server and client. The minimum TLS version is the lowest version of the protocol that a server or client will accept for secure communication.

How to create Cloudflare Integration

Tutorial :

You can watch the Video or Continue reading the post.

Follow the steps to Change to the TLS Minimum Version.

Navigate to the SSL/TLS of Cloudflare (Use this link to view How to Navigate).

Select the new version and Click on the "**Save**" button.

Here, you can see minimum TLS version is changed successfully.
