

How to Create Scheduler through the mobile app?

A scheduler is a useful tool for organizing and managing tasks, appointments, and events within Cloudpanzer. It allows users to schedule and track the progress of their work, as well as collaborate with others.

Prerequisites :

You must have an Active Server. You can jump to the tutorial section if the above conditions are proper, Or first follow the links below to set up the prerequisites.

How to install a Server

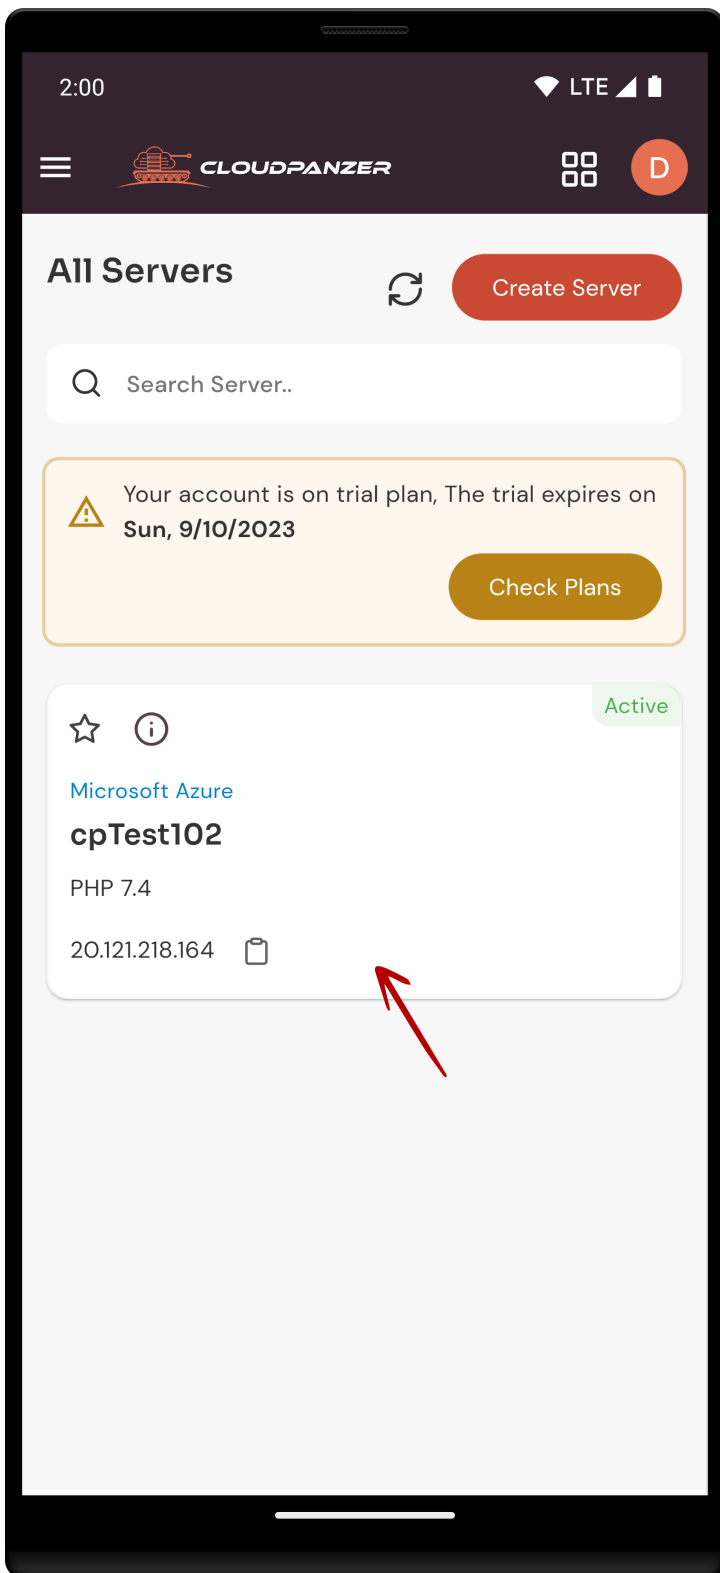

Tutorial :

You can watch the Video or Continue reading the post.
