

How to create user database through the cloudpanzer mobile application?

Creating a database user is a common task for database administrators and developers. It involves creating a new user account and granting it the necessary permissions to access and manipulate the database.

Prerequisites :

You must have an Active Server. You can jump to the tutorial section if the above conditions are proper, Or first follow the links below to set up the prerequisites.

How to install a Server

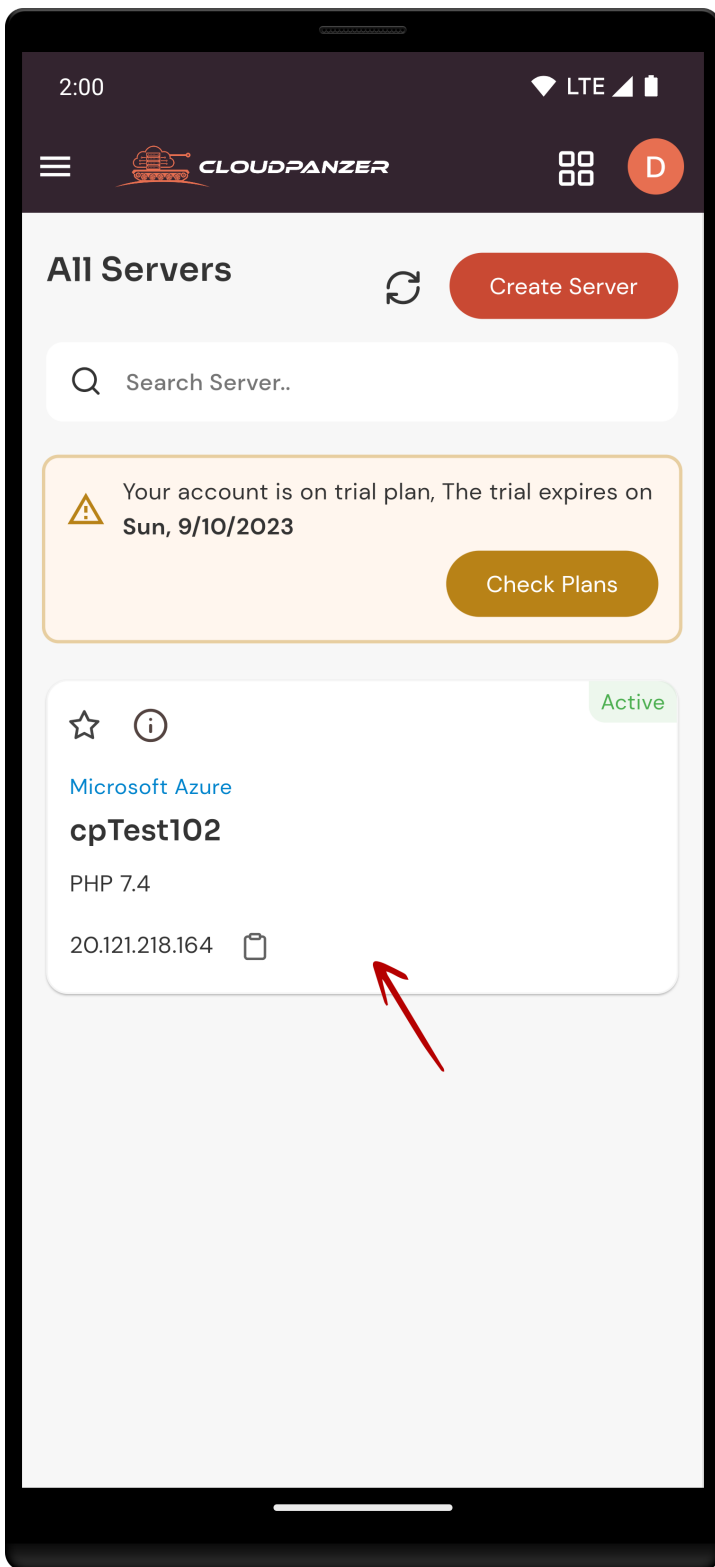

Tutorial :

You can watch the Video or Continue reading the post.

Follow the steps below to create a database user.

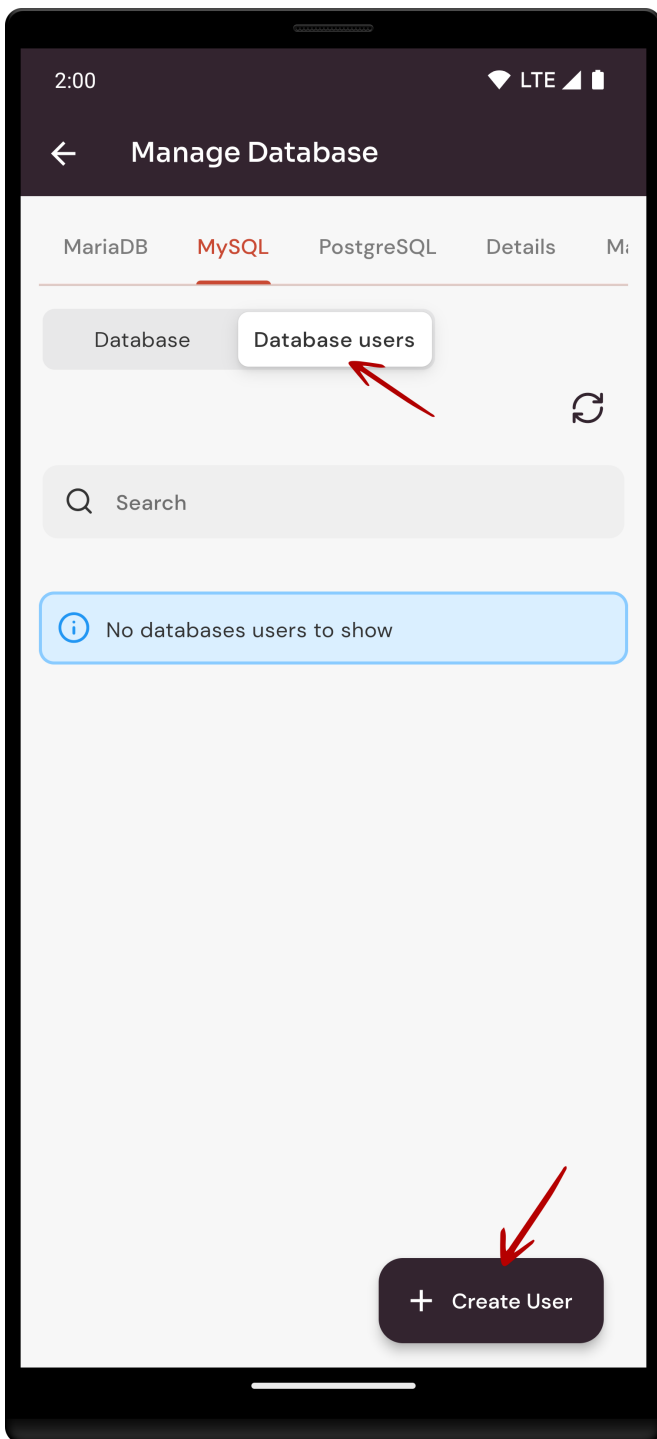

1: Firstly you are logged in, look for a "Server" and click on it.

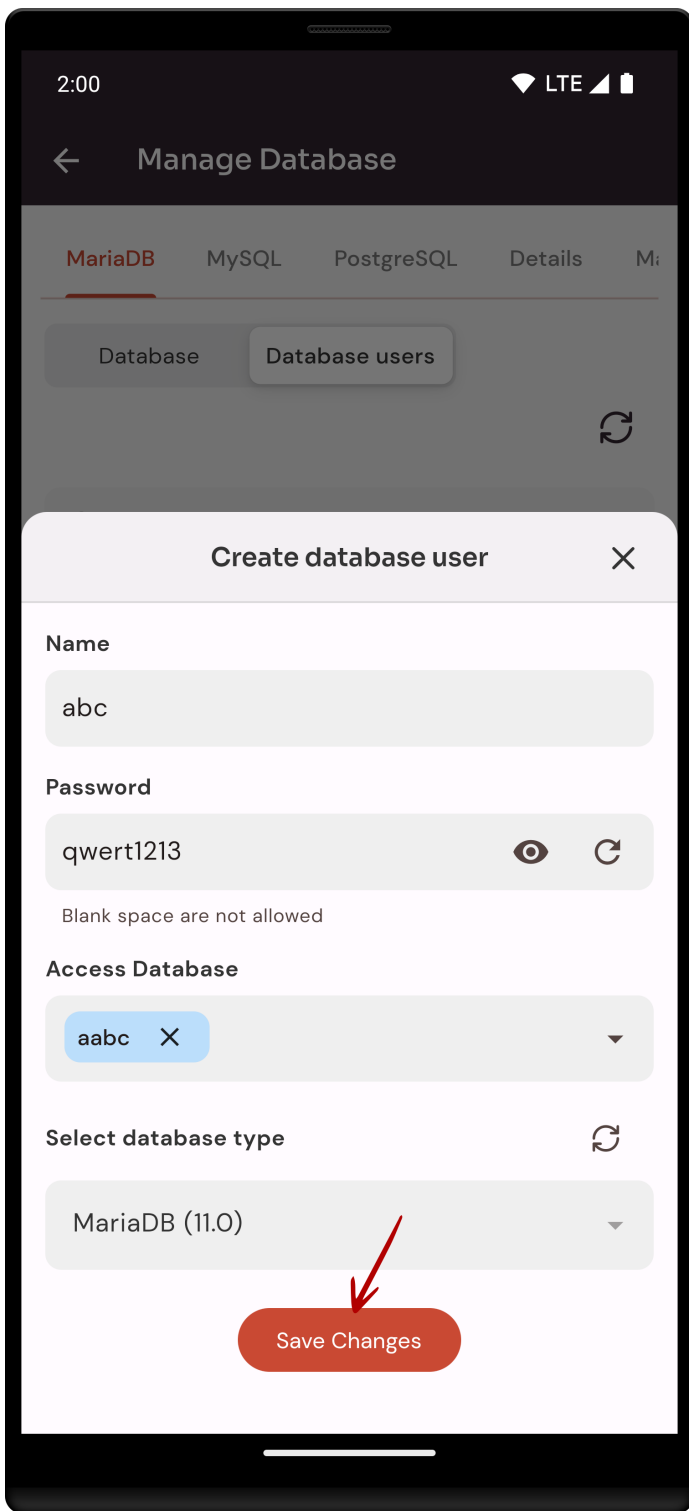

2: Click on the database option.

Click on the "**Database users**" tab and click on the Create User Button.

4: Fill in the fields and click on the Save Changes button to create a new database user.

Here, you can see the database user was created successfully.
