

# How to Disable Site Protection through the cloudpanzer mobile application?

To disable something means to turn it off or deactivate it so that it is no longer functional or able to be used.

## **Tutorial :**

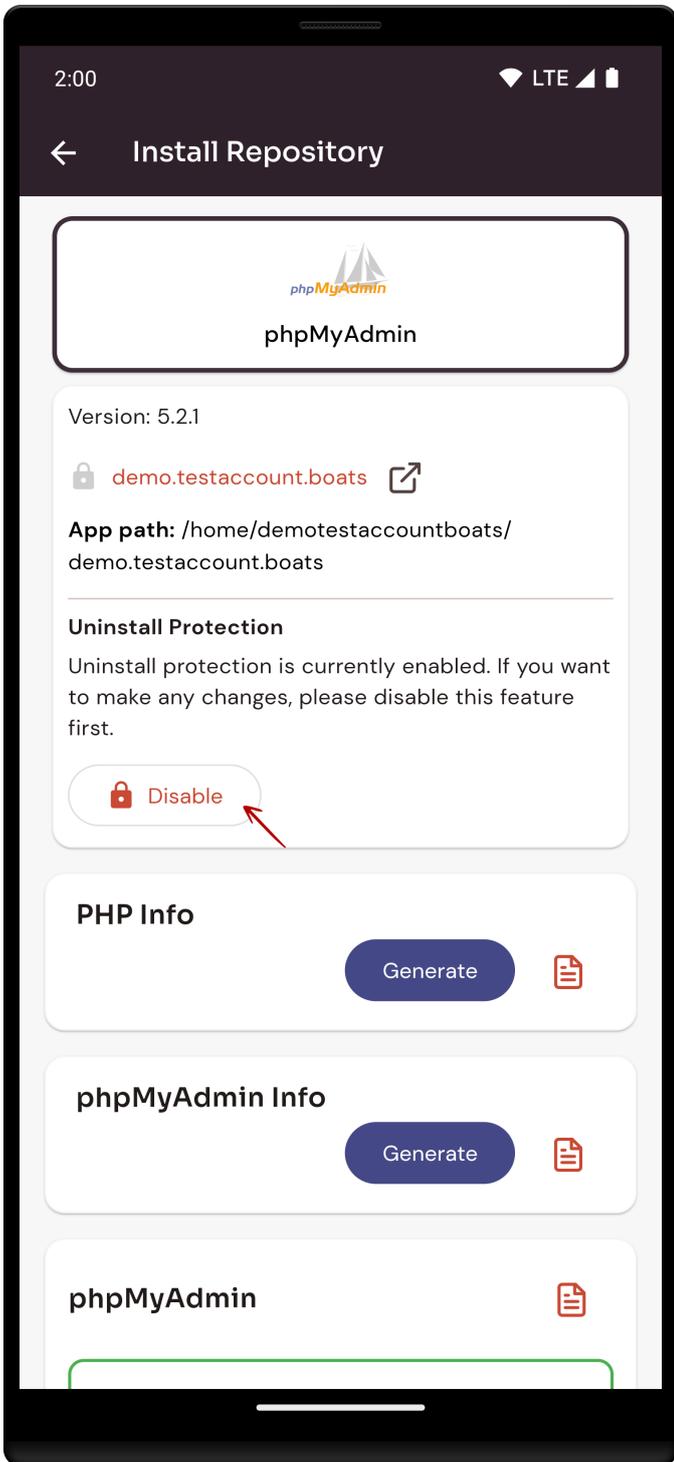

**You can watch the Video or Continue reading the post.**

## **Disable Site Protection :-**

**Navigate to the site Dashboard (Use this link to view How to Navigate)**

Click on the "Disable" button.

Enter to 4-digit code and Click on the "Verify" button.

Here, you can see the app has been disabled successfully.
