How to start a Daemons through the cloudpanzer mobile application?

Starting a daemon is typically done through the command line, and involves a few steps. The first step in starting a daemon is to create a script that will be used to start and stop the daemon. This script should contain all of the necessary commands to start and stop the daemon, as well as any required configuration options.

Prerequisites :

You must have an Active Server. You can jump to the tutorial section if the above conditions are proper, Or first follow the links below to set up the prerequisites.
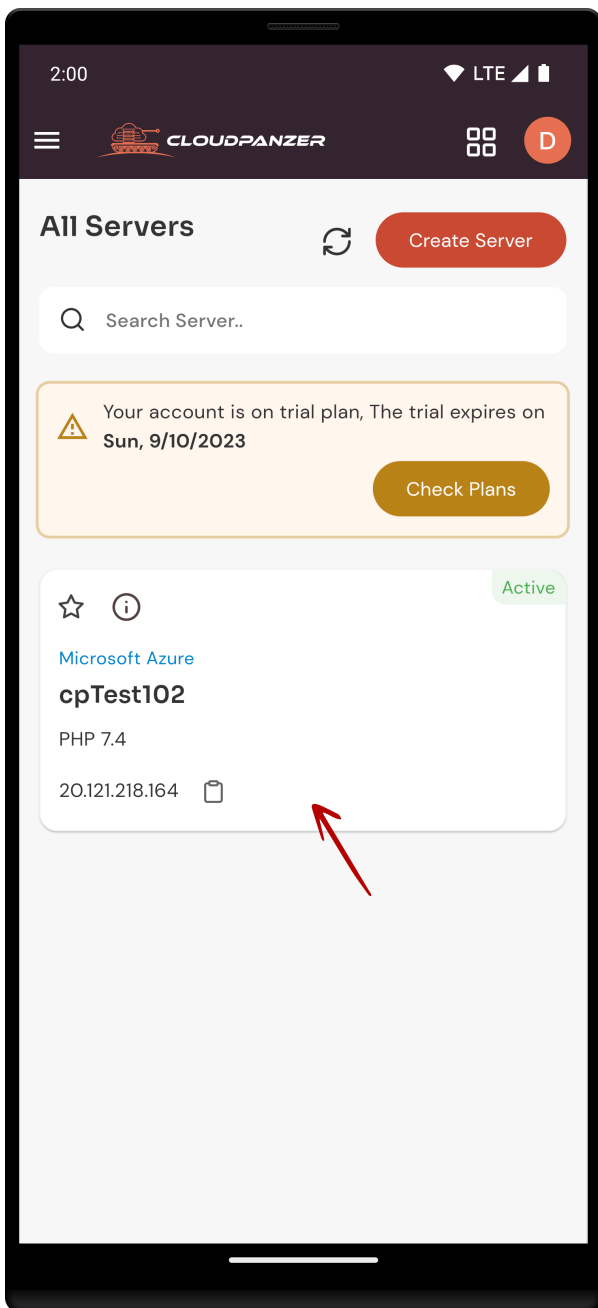

How to install a Server

Tutorial :

You can watch the Video or Continue reading the post.
