How to Delete Manage Backups ?

Follow the steps below to Delete Manage Backups.

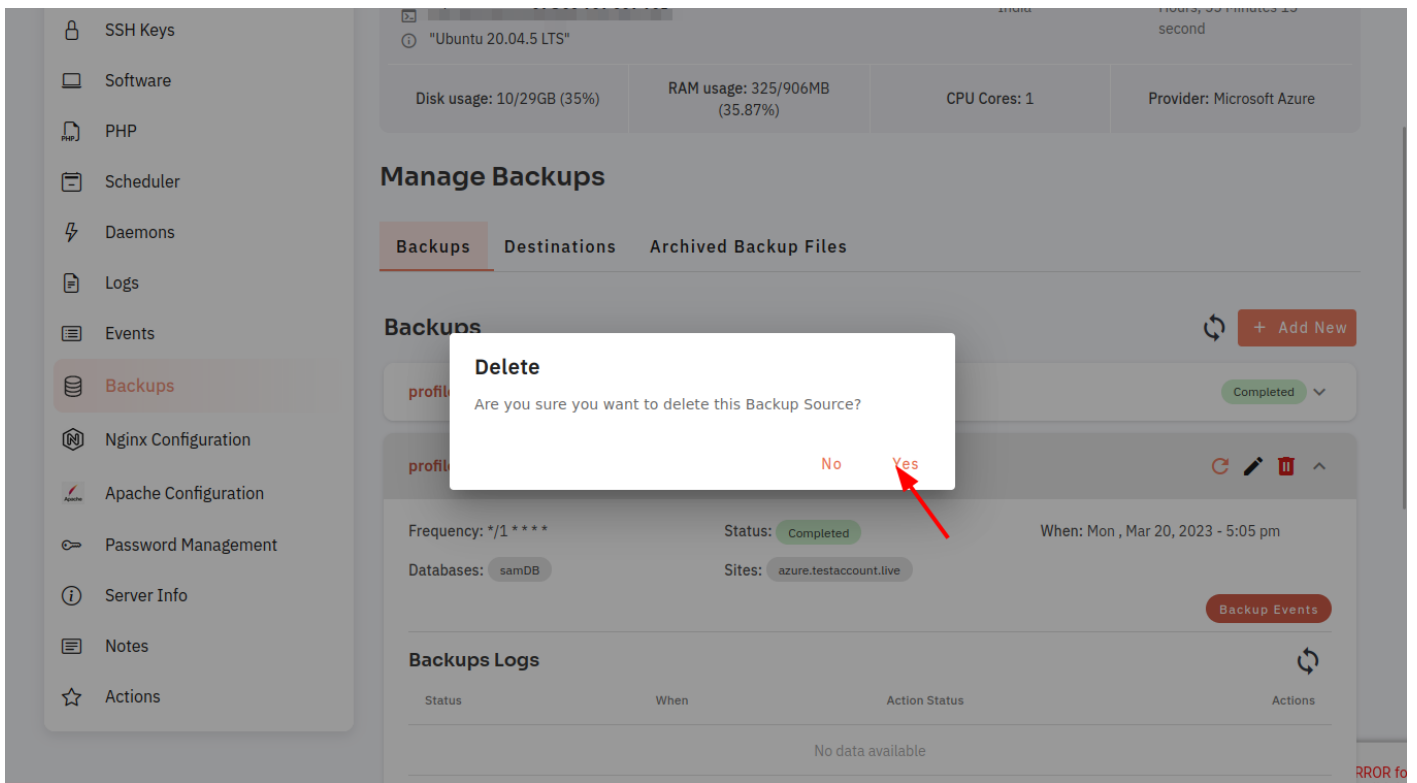

Navigate to the Delete Manage Backups.

(Use this link to view How to Navigate).

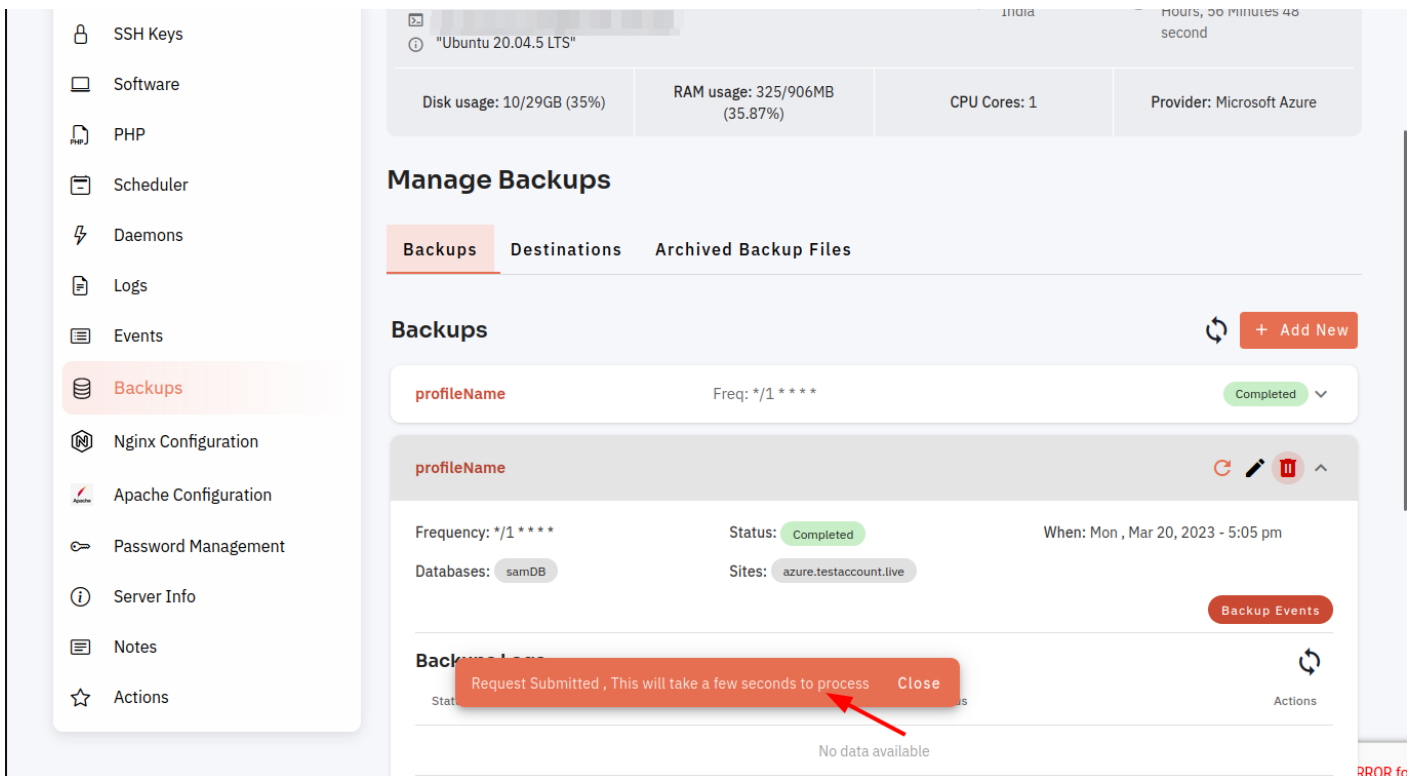

3. Click on the Delete Icon.

The screenshot displays a web application interface for managing backups. On the left is a sidebar with a list of navigation items: SSH Keys, Software, PHP, Scheduler, Daemons, Logs, Events, Backups (highlighted in orange), Nginx Configuration, Apache Configuration, Password Management, Server Info, Notes, and Actions. The main panel is titled "Manage Backups" and has three tabs: Backups, Destinations, and Archived Backup Files. The "Backups" tab is active. Below the tabs, there's a "Backups" section with a search bar and a "+ Add New" button. A backup profile is shown with details: profileName, Freq: */1 ****, Status: Completed, and When: Mon, Mar 20, 2023 - 5:05 pm. A red arrow points to a delete icon (a trash can) in the top right corner of the backup profile card. Below the backup details is a "Backups Logs" section with a table header: Status, When, Action Status, and Actions. The table currently shows "No data available".

4. Show the Delete Dialog and Click on the yes Button.

5. Here you can see Delete Manage Backups are Successful.

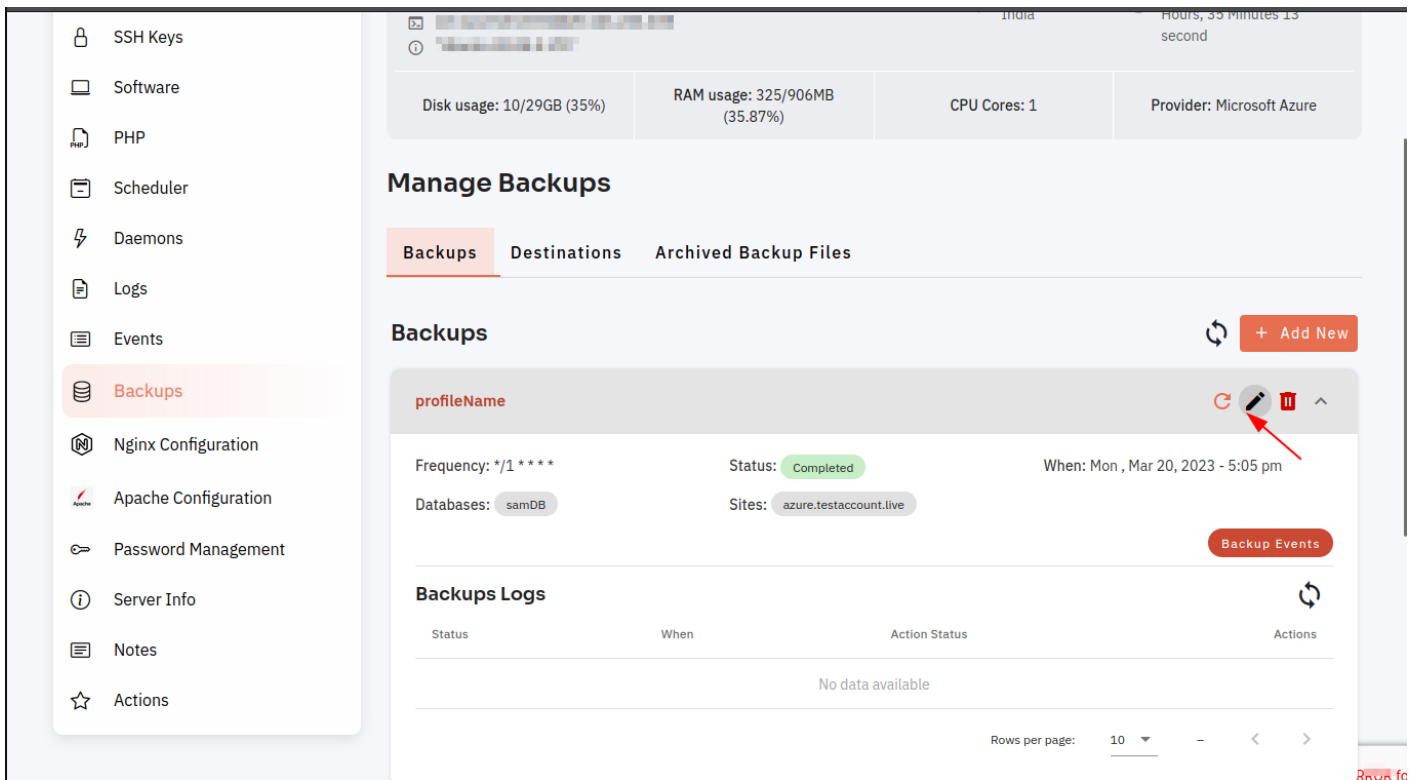

How to Edit Manage Backups?

Follow the steps below to Edit Manage Backups.

Navigate to the Edit Manage Backups.

(Use this link to view How to Navigate).

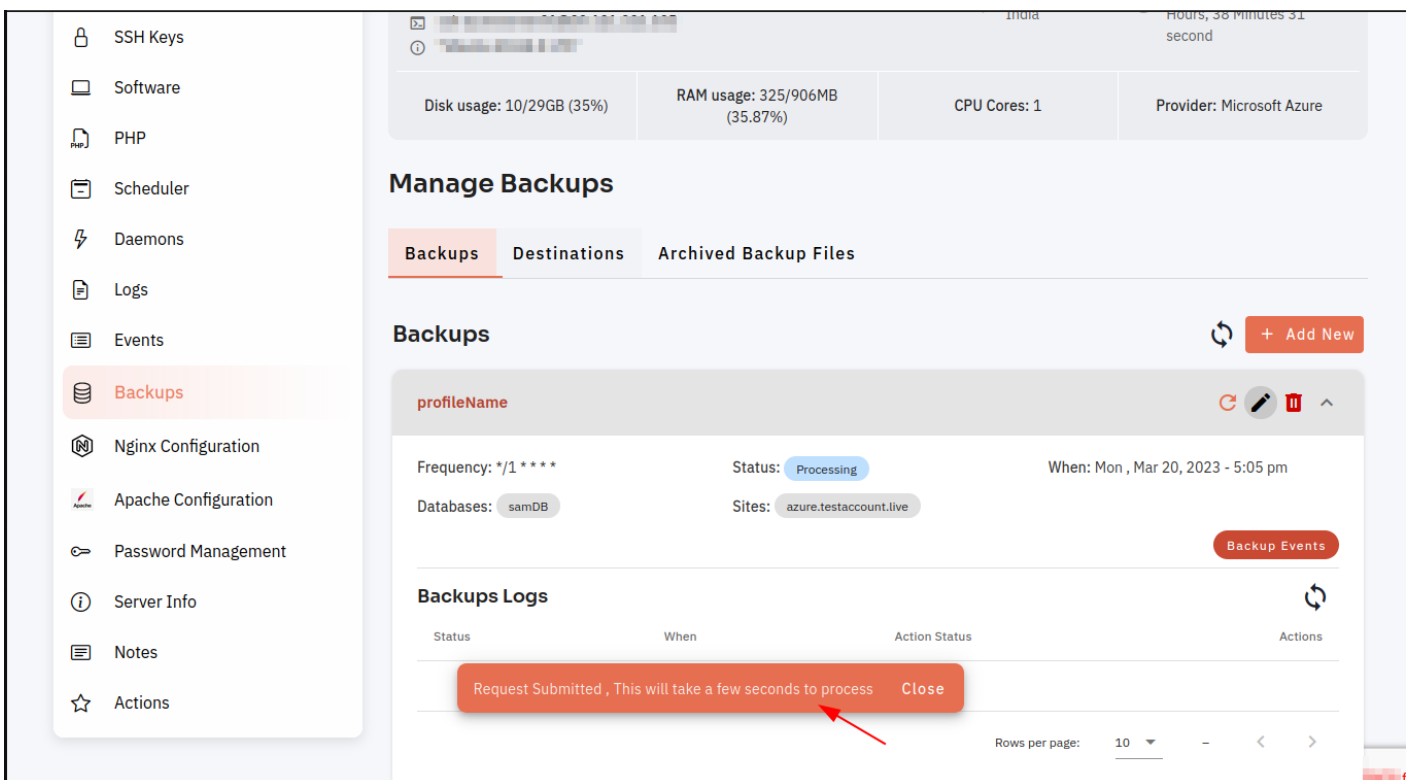

3. Click on the Edit Icon.

4. Show the Edit Dialog and Click on the Save Changes Button.

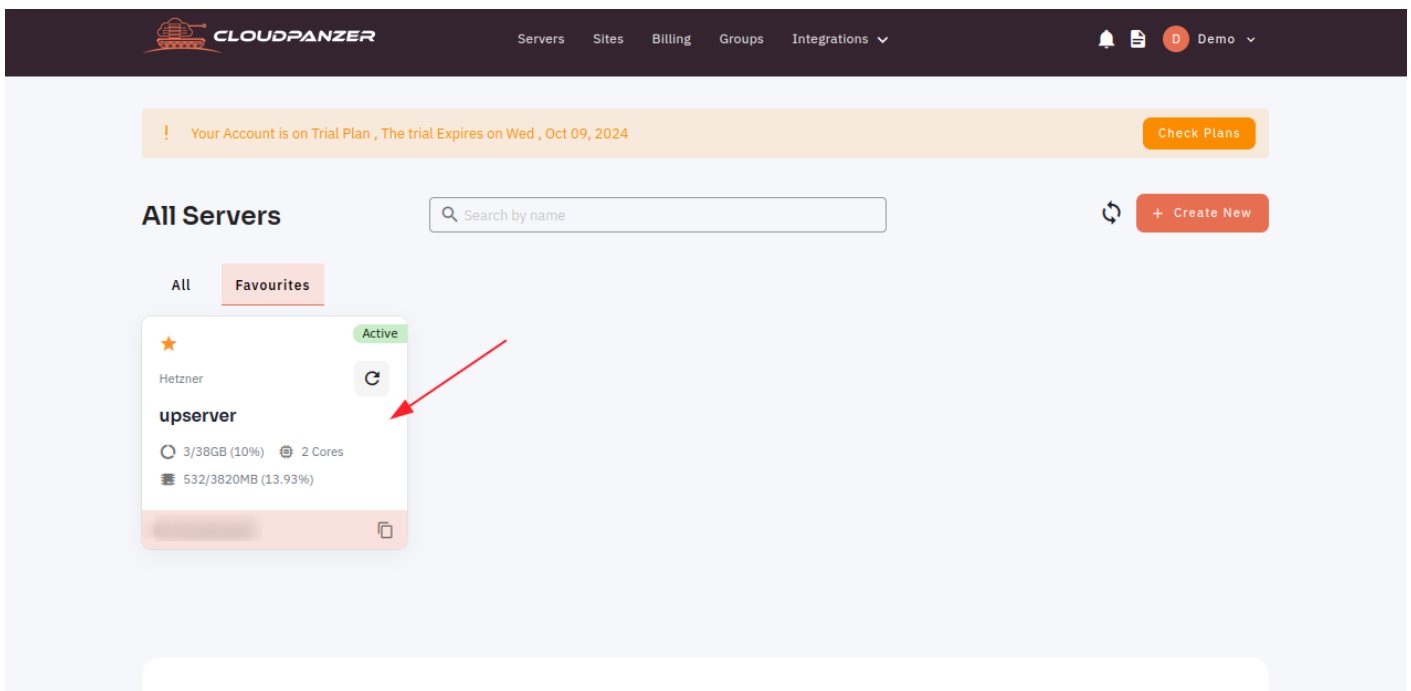

5. Here you can see Edit Manage Backups are successful.

How to Navigate Manage Backups ?

Follow the steps below to Manage Backups.
