# How to check event of Node.js on site through the cloudpanzer website?

## Tutorial :

**You can watch the Video or Continue reading the post.**

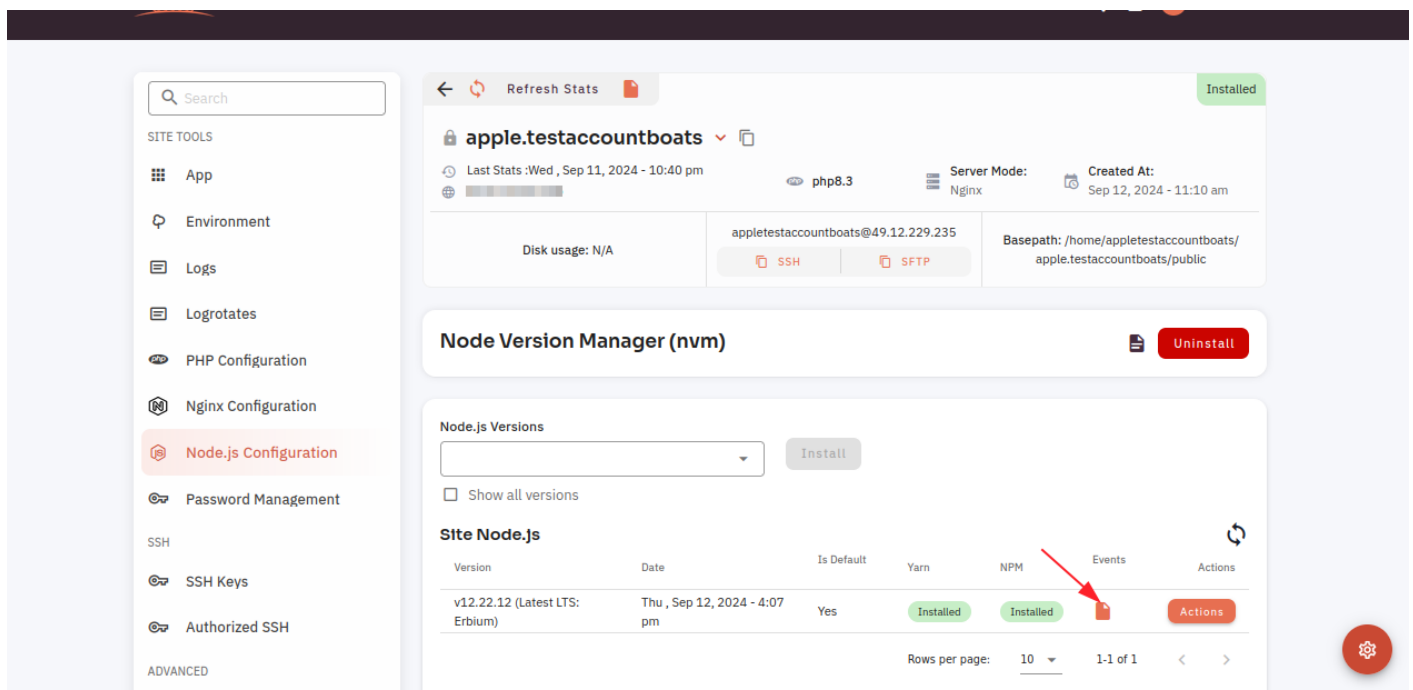

<https://www.youtube.com/embed/kDuhSrMzyM4>

Follow the steps below to Node.js install check Event.

## Navigate to the Node js

**(Use this link to view How to Navigate).**

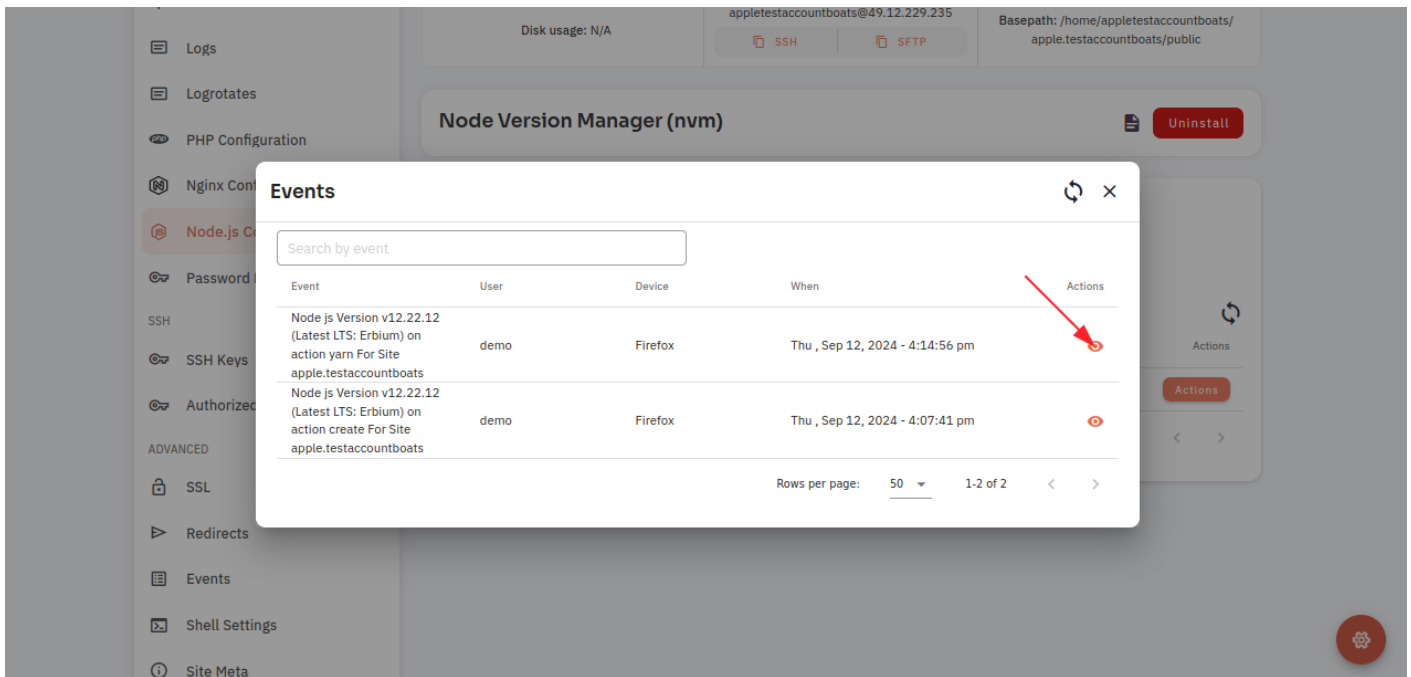

### 3. Select an Event Option

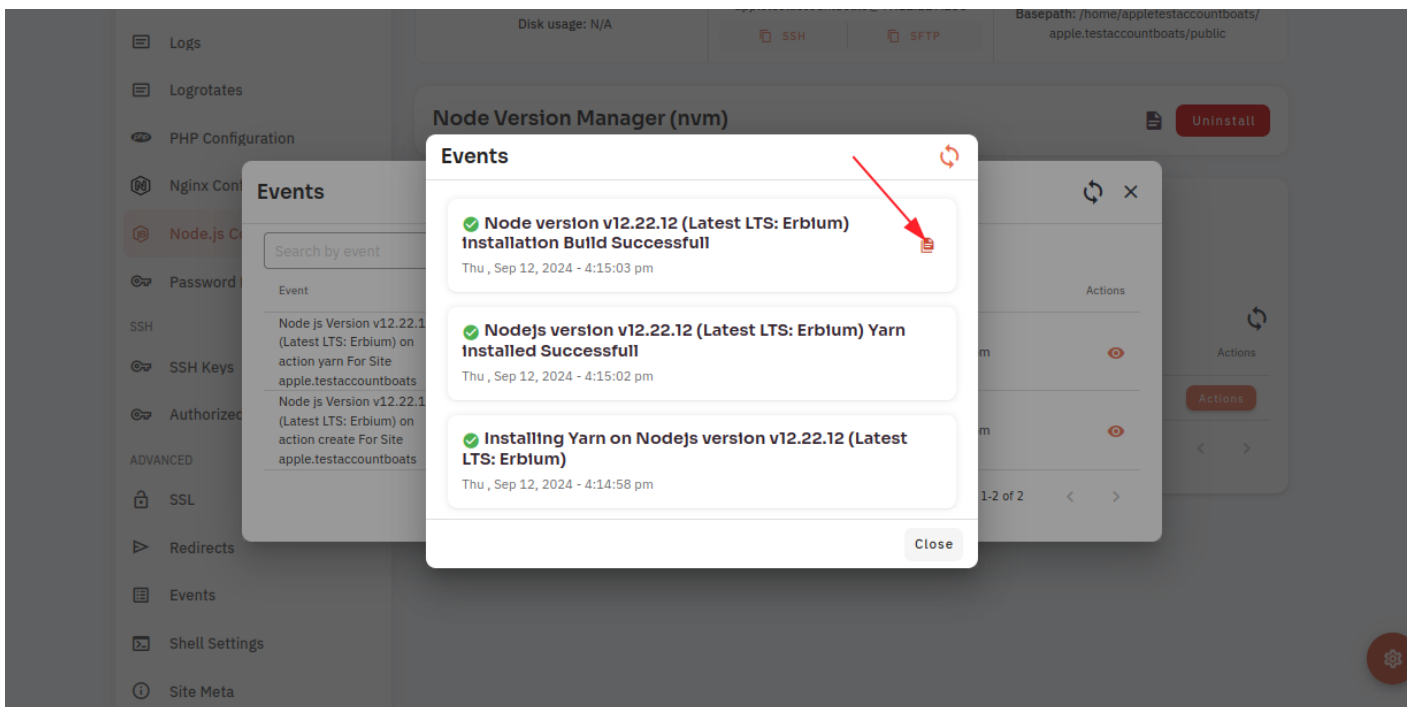

The screenshot displays the Cloudpanzer website interface. On the left is a sidebar with a search bar and a list of site tools: App, Environment, Logs, Logrotates, PHP Configuration, Nginx Configuration, Node.js Configuration (highlighted), Password Management, SSH, SSH Keys, and Authorized SSH. The main content area shows the configuration for 'apple.testaccountboats'. It includes a 'Refresh Stats' button, a status bar with 'php8.3' and 'Nginx', and a 'Created At' timestamp. Below this is a 'Node Version Manager (nvm)' section with an 'Uninstall' button. The 'Node.js Versions' section features a dropdown menu and an 'Install' button. A table titled 'Site Node.js' lists installed versions. A red arrow points to the 'Events' column header in this table.

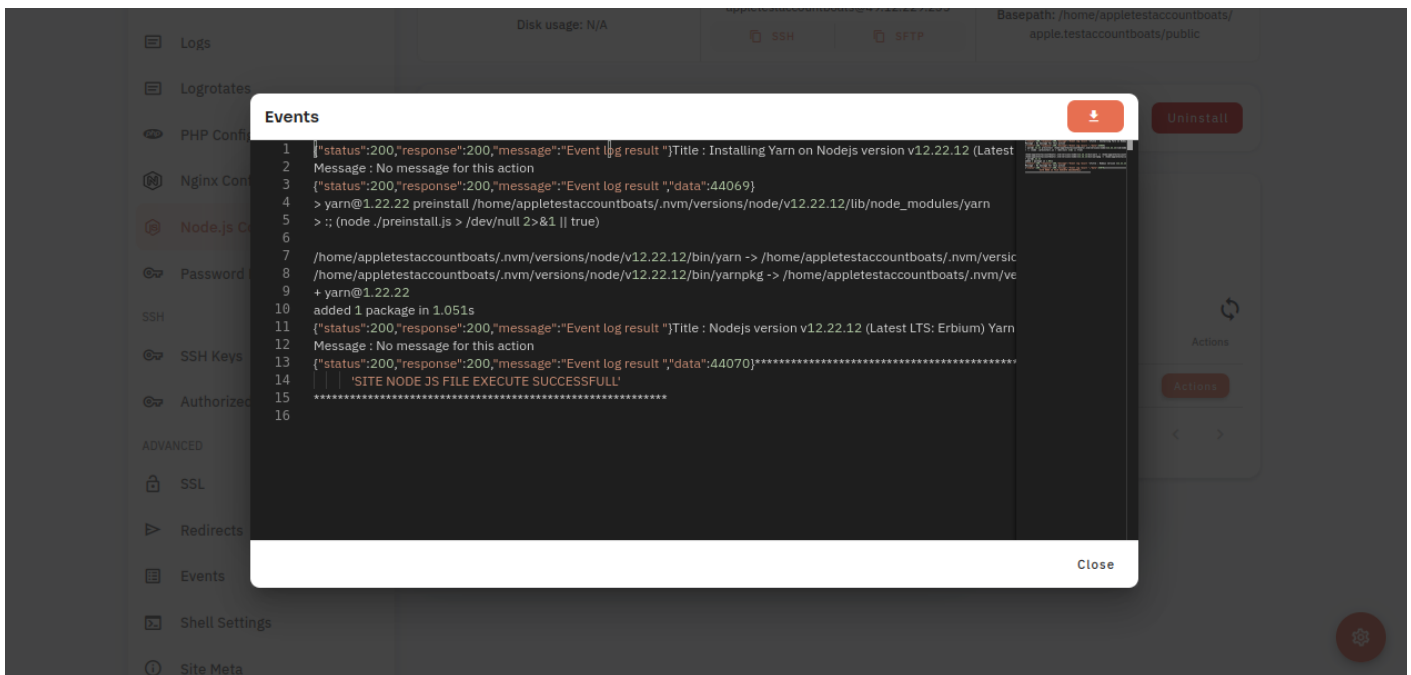

Version	Date	Is Default	Yarn	NPM	Events	Actions
v12.22.12 (Latest LTS: Erbium)	Thu, Sep 12, 2024 - 4:07 pm	Yes	Installed	Installed		Actions

4. Click on the Eye icon.

5. Here you can see the Node.js Event data.

# How to delete Node.js on site through the cloudpanzer website?

## Tutorial :

**You can watch the Video or Continue reading the post.**

<https://www.youtube.com/embed/0kuUQ4IeJUI>

Follow the steps below to Delete Node.js Installed version

## Navigate to the Node js

**(Use this link to view How to Navigate).**

3. Click on the Action Button.

The screenshot shows the CloudPanzer website interface. On the left is a sidebar with a search bar and navigation links: SITE TOOLS (App, Environment, Logs, Logrotates, PHP Configuration, Nginx Configuration, Node.js Configuration, Password Management), SSH (SSH Keys, Authorized SSH), and ADVANCED. The main content area has a top bar with 'Refresh Stats' and 'Installed' status. Below this, server details for 'apple.testaccountboats' are shown, including 'Last Stats', 'php8.3', 'Server Mode: Nginx', 'Created At', 'Disk usage: N/A', 'SSH', 'SFTP', and 'Basepath'. The 'Node Version Manager (nvm)' section features an 'Uninstall' button. The 'Node.js Versions' section has a search bar and an 'Install' button. Below this is a table titled 'Site Node.js' with columns: Version, Date, Is Default, Yarn, NPM, Events, and Actions. The table lists one version: 'v12.22.12 (Latest LTS: Erbium)' installed on 'Thu, Sep 12, 2024 - 4:07 pm'. A red arrow points to the 'Actions' button in the table. The bottom of the page shows 'Rows per page: 10' and '1-1 of 1'.

# How to install Yarn in node.js on site through the cloudpanzer website?

## Tutorial :

**You can watch the Video or Continue reading the post.**

<https://www.youtube.com/embed/WSyc9NrxnIA>

Follow the steps below to install Yarn in node.js on Site.

## Navigate to the Node js

**(Use this link to view How to Navigate).**

3. Click on the Action button.

The screenshot shows the Cloudpanzer website interface. On the left is a sidebar with 'SITE TOOLS' including App, Environment, Logs, Logrotates, PHP Configuration, Nginx Configuration, Node.js Configuration (highlighted), Password Management, and SSH. Below these are 'ADVANCED' options like SSL and Redirects. The main content area shows server details for 'apple.testaccountboats', including last stats, server mode (Nginx), and created at date. Below this is the 'Node Version Manager (nvm)' section with an 'Uninstall' button. The 'Node.js Versions' section features a dropdown menu and an 'Install' button. A table titled 'Site Node.js' lists installed versions. A red arrow points to the 'Actions' button in the table.

# How to manage node.js configuration on site through the cloudpanzer website?

**Tutorial :**

**You can watch the Video or Continue reading the post.**

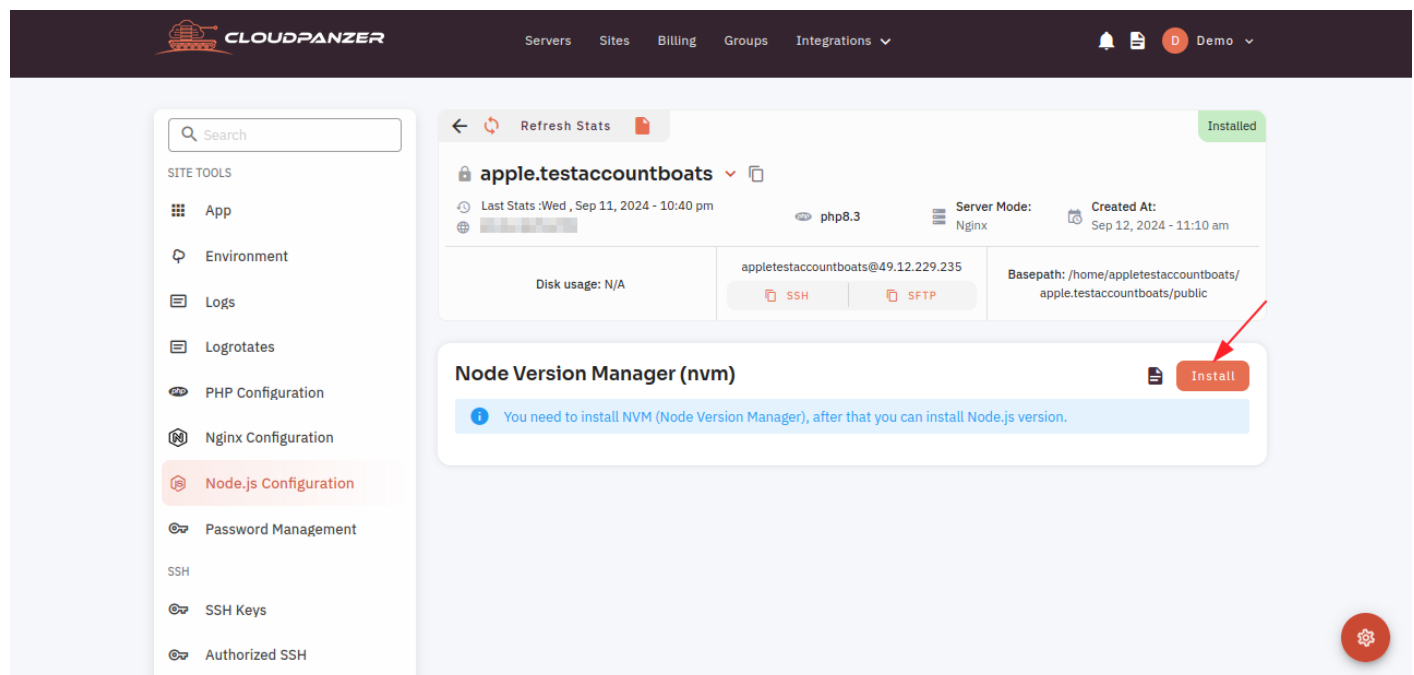

<https://www.youtube.com/embed/IQh034xp3vQ>

Follow the steps below to Node.js.

**Navigate to the Node js**

**(Use this link to view How to Navigate).**

Click on the Install button.

The screenshot displays the CloudPanzer dashboard. The top navigation bar includes links for Servers, Sites, Billing, Groups, and Integrations, along with a Demo button. The left sidebar lists various site tools, with 'Node.js Configuration' highlighted. The main content area shows the configuration for a site named 'apple.testaccountboats'. It includes details such as 'Last Stats', 'Server Mode' (Nginx), 'Created At', 'Disk usage', and 'Basepath'. A 'Node Version Manager (nvm)' section is visible, featuring an 'Install' button with a red arrow pointing to it. A message below the button states: 'You need to install NVM (Node Version Manager), after that you can install Node.js version.'

3. Install the Node.js Version from the dropdown.

The screenshot shows the 'Node.js Configuration' page for the site 'apple.testaccountboats'. The left sidebar lists various site tools, with 'Node.js Configuration' highlighted. The main content area displays the 'Node Version Manager (nvm)' section. A red arrow points to the 'Node.js Versions' dropdown menu, which is currently empty. Below the dropdown is a checkbox labeled 'Show all versions'. To the right of the dropdown is an 'Install' button. Below these elements is a table titled 'Site Node.js' with columns: Version, Date, Is Default, Yarn, NPM, Events, and Actions. The table currently shows 'No data available'. At the bottom right, there is a 'Rows per page' selector set to 10. A red gear icon is visible in the bottom right corner of the interface.

4. Click on the Install Button.

This screenshot is similar to the previous one, but the 'Node.js Versions' dropdown menu is now populated with the text 'v12.22.12 (Latest LTS: Erbium)'. A red arrow points to the 'Install' button, indicating the next step in the process. The rest of the interface, including the sidebar, the 'Node Version Manager (nvm)' header, the 'Show all versions' checkbox, the 'Site Node.js' table, and the 'Rows per page' selector, remains the same as in the previous screenshot.

Here, you can install Node.js successfully.

The screenshot displays the CloudPanzer control panel interface. On the left is a sidebar with a search bar and a list of site tools: App, Environment, Logs, Logrotates, PHP Configuration, Nginx Configuration, Node.js Configuration (highlighted in red), Password Management, SSH, SSH Keys, and Authorized SSH. The main content area shows the configuration for the site 'apple.testaccountboats'. At the top, it includes a 'Refresh Stats' button, a status 'Installed', and site details like 'Last Stats: Wed, Sep 11, 2024 - 10:40 pm', 'php8.3', 'Server Mode: Nginx', and 'Created At: Sep 12, 2024 - 11:10 am'. Below this, there's a section for 'Node Version Manager (nvm)' with an 'Uninstall' button. The 'Node.js Versions' section features a dropdown menu, an 'Install' button, and a 'Show all versions' checkbox. A table titled 'Site Node.js' lists installed versions. A red arrow points to the 'Installed' status of the v12.22.12 version.

Version	Date	Is Default	Yarn	NPM	Events	Actions
v12.22.12 (Latest LTS: Erbium)	Thu, Sep 12, 2024 - 4:07 pm	Yes	Pending	Installed		Actions
