# How to check server update on the cloudpanzer website?

A **server update** refers to the process of updating the software, services, and security patches on a server to ensure it remains secure, reliable, and up-to-date. Server updates are critical for maintaining the health and performance of a server.

Follow the steps below to navigate shell aliases:

1: Once logged in, look for a "Server" and click on it.

2. Select the Server updates option.

3. Click on the check button.

Here, in these logs, you can check server updation successfully.
