How to delete Authenticate Routes Info through the cloudpanzer mobile?

Follow the steps below to Site Authenticate Routes Navigation.

1: Once logged in, look for a "Server" and click on it.

2. Click on the Site option and Select an Active Site.

The screenshot shows the Cloudpanzer dashboard. On the left sidebar, the 'Sites' menu item is highlighted with a red arrow. The main content area displays the 'upserver' status and a table of 'Active Sites'.

upserver Status:

- Refresh Stats: PostgreSQL, Nginx, Redis, Supervisor, 5 More
- Active: Yes
- PHP: php8.2
- Server Mode: Nginx
- Uptime: Mon 9 Sep - 4 Days, 18 Hours, 42 Minutes 5 second
- Stats last sync: Sat, Sep 14, 2024 - 3:51 am
- Disk usage: 4/38GB (12%)
- RAM usage: 656/3820MB (17.17%)
- CPU Cores: 2
- Provider: Hetzner

Active Sites Table:

Domain	App	PHP	Status	User	SSH	Isolated	Events
apple.testaccountboats		php8.2	Installed	appletestaccountboats	Yes	Yes	
newsite.testaccount.boats		php8.3	Installed	newsitetestaccountboats	Yes	Yes	

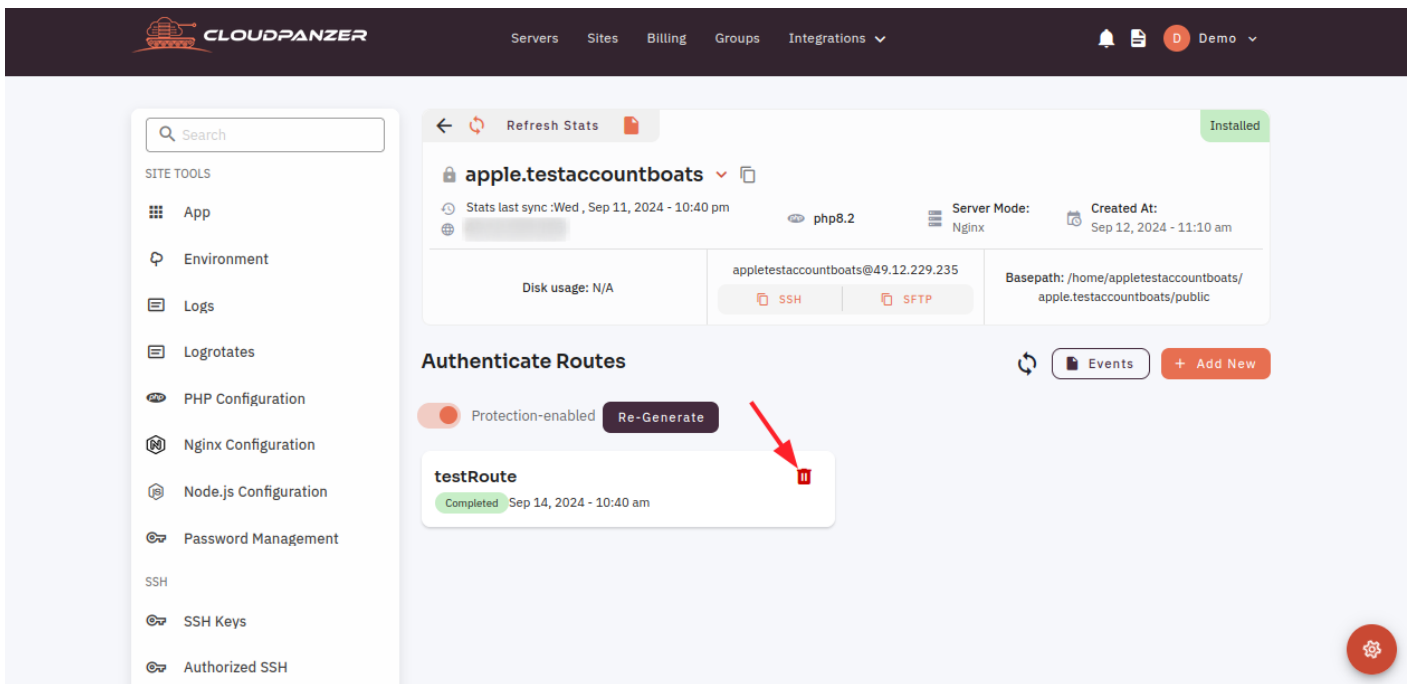

3. Click on the Authenticate Routes Option.

The screenshot shows the Cloudpanzer dashboard with the 'Authenticate Routes' menu item highlighted in the sidebar with a red arrow. The main content area is empty.

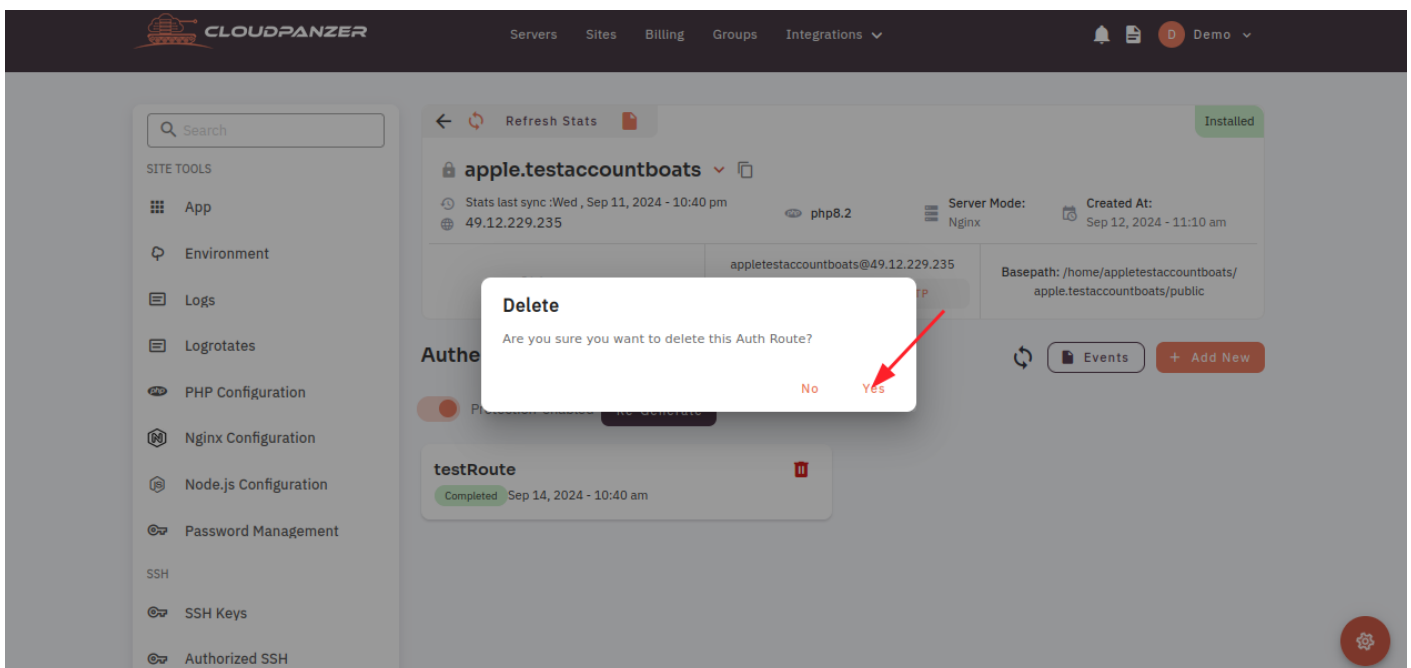

Sidebar Menu:

- Authorized SSH
- ADVANCED
- SSL
- Redirects
- Events
- Shell Settings
- Site Meta
- Actions
- SERVER TOOLS
- Command
- Scheduler/Cron
- Daemons
- Authenticate Routes**
- Other Configurations
- Notes

4. Click on the Delete icon.

5. Click on the yes button.

Here, you can see that Authenticate Routes were deleted successfully.
