

How to add new Shell Aliases Group on site in CloudPanzer?

Shell alias groups are used to organize related command shortcuts (aliases) in a shell environment. They enhance organization, readability, and efficiency by categorizing commands, improving access to specific tools, and reducing naming conflicts. Alias groups streamline workflows, support customization, and promote collaboration in team environments. They make maintenance easier and facilitate quick transitions between different task contexts, contributing to a more structured and productive command-line experience.

Follow the steps below to add Shell Aliases

Navigate to the Shell Aliases

[Use this link to view How to Navigate](#)

4. Click on the Groups tab.

The screenshot shows the 'Shell Settings' page in a web application. On the left is a sidebar with various configuration options, including 'Shell Settings' which is highlighted. The main content area is titled 'Shell Type' and has tabs for 'Basic', 'Advance', and 'Groups'. A red arrow points to the 'Groups' tab. Below the tabs, the file path is shown as '/home/cptest104/.bash_aliases'. The 'Shell Aliases' section contains a table with the following data:

Key	Value	Status	Actions
nrs	npm run serve	Finished	
pas	php artisan serve	Finished	
new	new val	Finished	
cu	composer update	Finished	

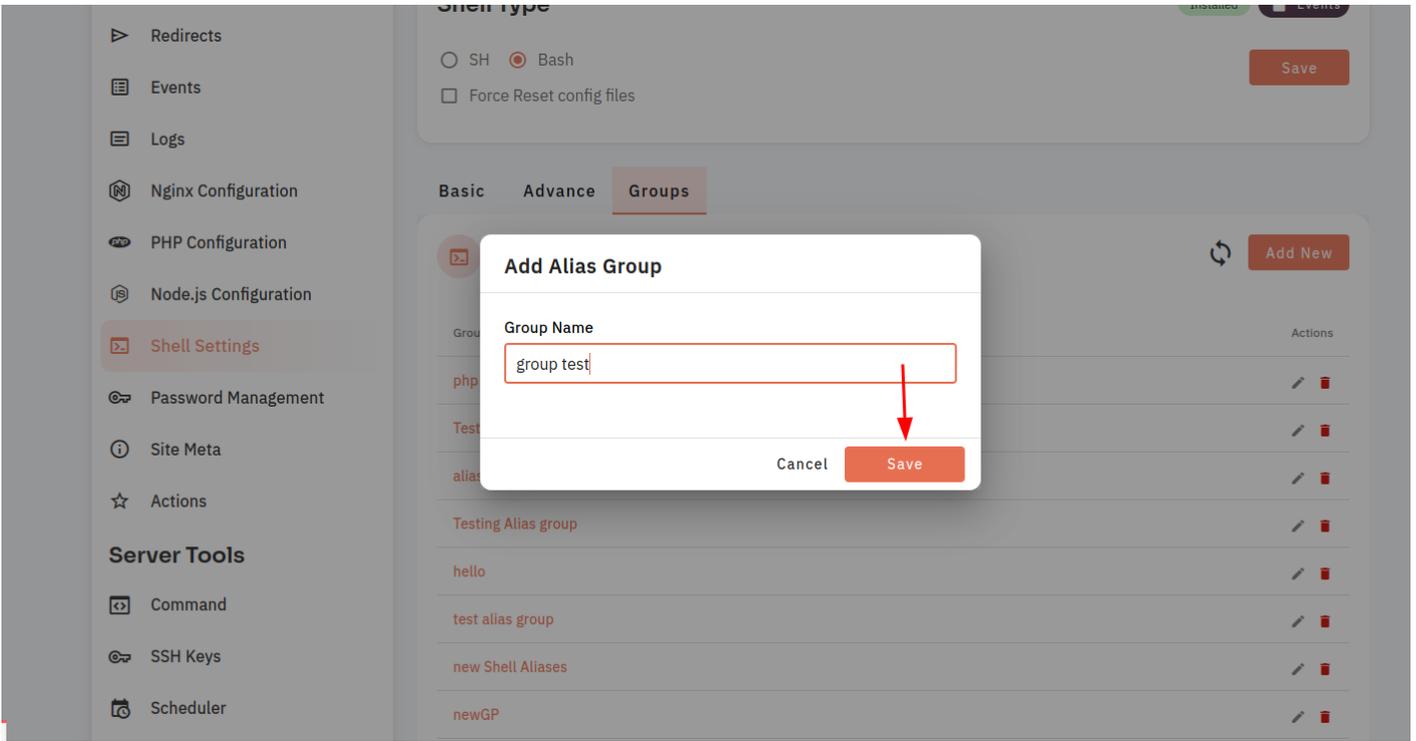

At the bottom right of the table, there is a pagination control showing 'Rows per page: 10' and '1-4 of 4'.

5. Click on the Add New Button.

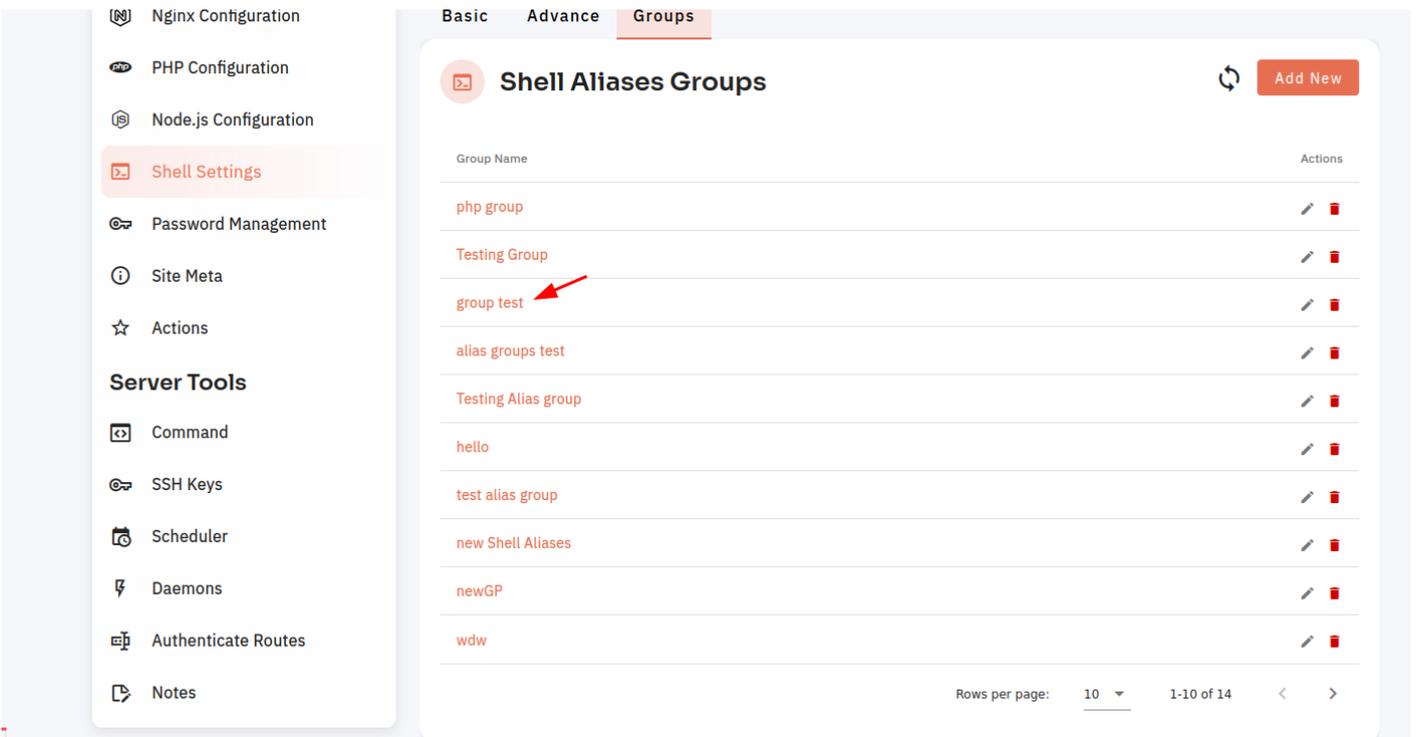

The screenshot shows the 'Shell Aliases Groups' page. The 'Groups' tab is selected. The page title is 'Shell Aliases Groups'. A red arrow points to the 'Add New' button in the top right corner. Below the title, there is a table with the following data:

Group Name	Actions
php group	
Testing Group	
alias groups test	
Testing Alias group	
hello	
test alias group	
new Shell Aliases	
newGP	

6. Enter the Group name and then click on the Save button.

7. Here, you can see that the group added successfully.
