

How to change server username on CloudPanzer?

Changing a server's username can be a useful task for a number of reasons, such as improving security or simplifying management.

Tutorial :

You can watch the Video or Continue reading the post.

Follow the steps below to change the server username

Navigate to the Server Info

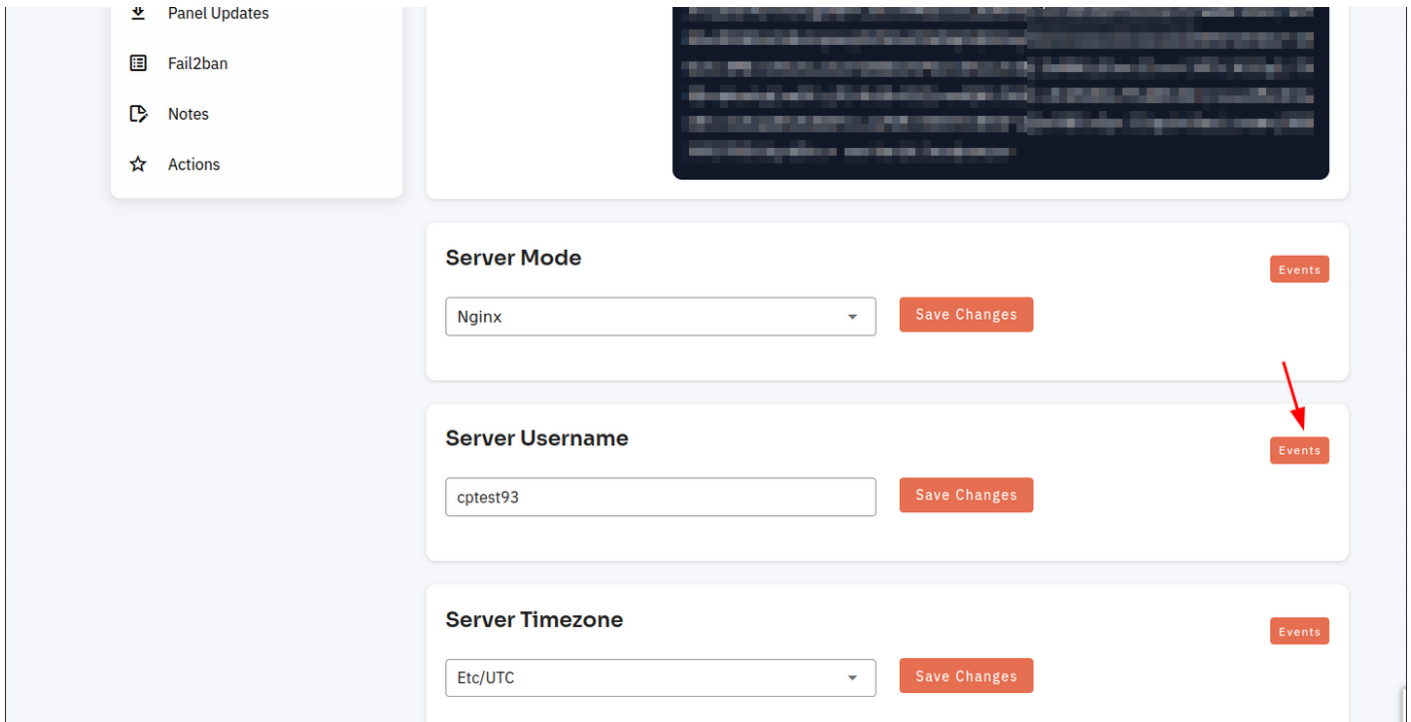

Use this link to view How to Navigate

3. You can edit the server username and then click on the Save Changes Button.

The screenshot displays the 'Server Info' configuration page in CloudPanzer. At the top, there is a dark terminal window showing command-line output. Below it, a 'Tap to Copy' button is visible. The main configuration area consists of three sections: 'Server Mode' with a dropdown menu set to 'Nginx', 'Server Username' with a text input field containing 'cptest60', and 'Server Timezone' with a dropdown menu set to 'Etc/UTC'. Each section has a 'Save Changes' button and an 'Events' button. A red rectangular box highlights the 'Server Username' section, and a red arrow points from the bottom right of this box to the 'Save Changes' button.

4. You can also check events by clicking on the Events button.
