

How to change server username on CloudPanzer?

Changing a server's username can be a useful task for a number of reasons, such as improving security or simplifying management.

Tutorial :

You can watch the Video or Continue reading the post.

Follow the steps below to change the server username

Navigate to the Server Info

Use this link to view How to Navigate

3. You can edit the server username and then click on the Save Changes Button.

The screenshot displays the 'Server Info' configuration page in CloudPanzer. At the top, there is a dark blue header with a blurred text area and a 'Top to Copy' button. Below this, the configuration is organized into three sections, each with a title, a dropdown menu, and a 'Save Changes' button. The first section is 'Server Mode' with a dropdown set to 'Nginx'. The second section, 'Server Username', is highlighted with a red rectangular border; its dropdown contains the text 'cptest60', and a red arrow points from the 'Save Changes' button to the text. The third section is 'Server Timezone' with a dropdown set to 'Etc/UTC'. Each section also includes an 'Events' button on the right side.

4. You can also check events by clicking on the Events button.
