

How to check server update on the cloudpanzer website?

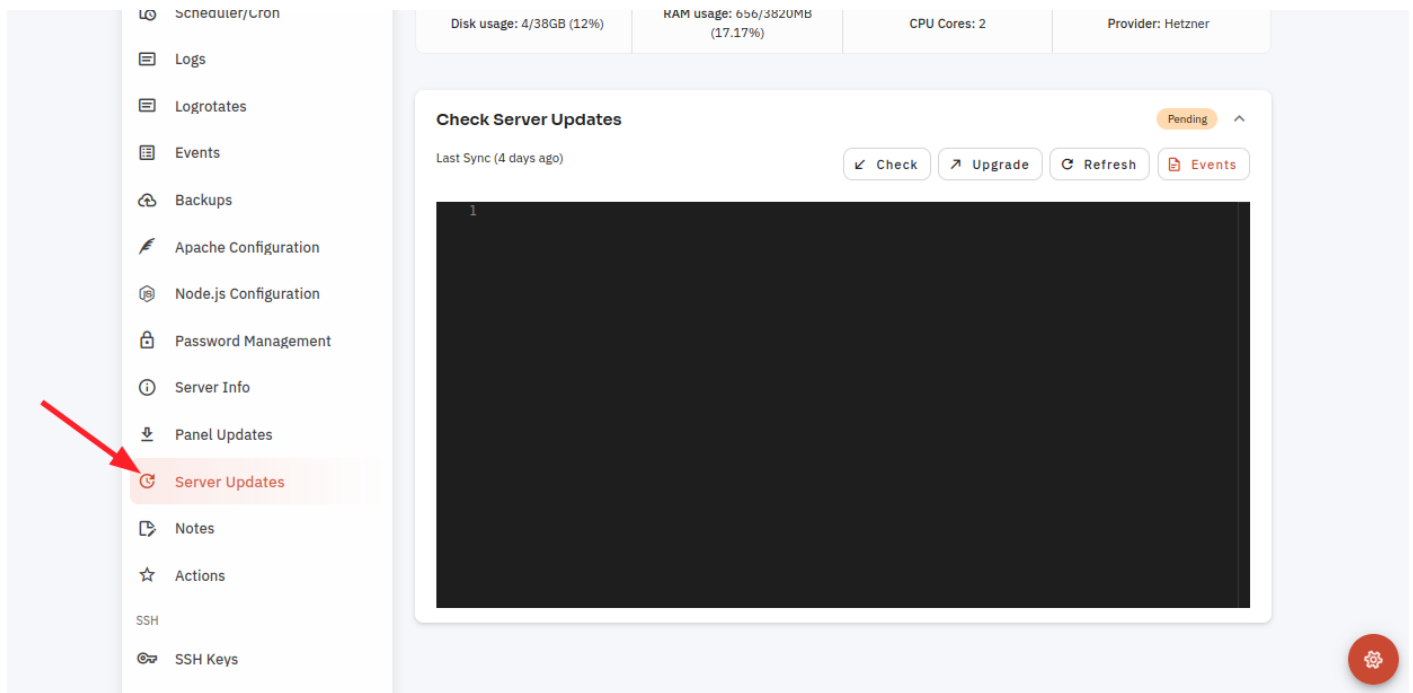

A **server update** refers to the process of updating the software, services, and security patches on a server to ensure it remains secure, reliable, and up-to-date. Server updates are critical for maintaining the health and performance of a server.

Follow the steps below to navigate shell aliases:

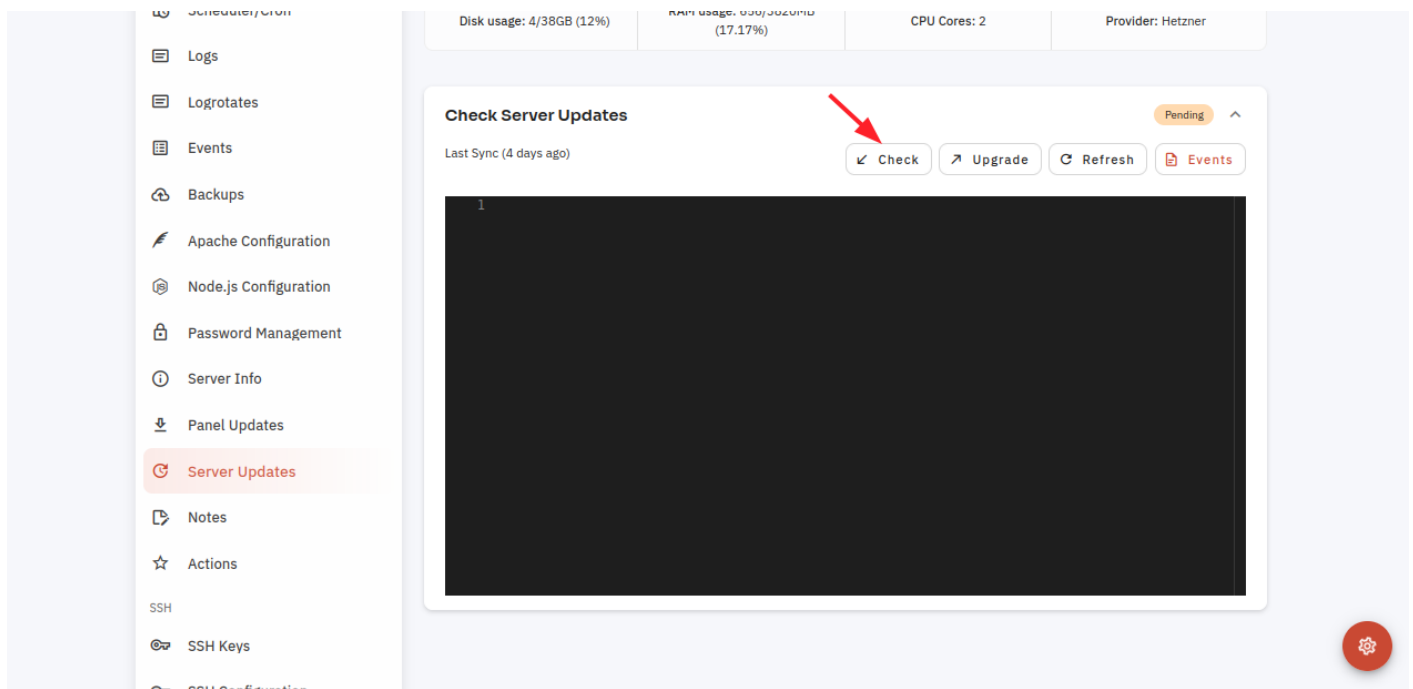

1: Once logged in, look for a "Server" and click on it.

2. Select the Server updates option.

3. Click on the check button.

Here, in these logs, you can check server updation successfully.

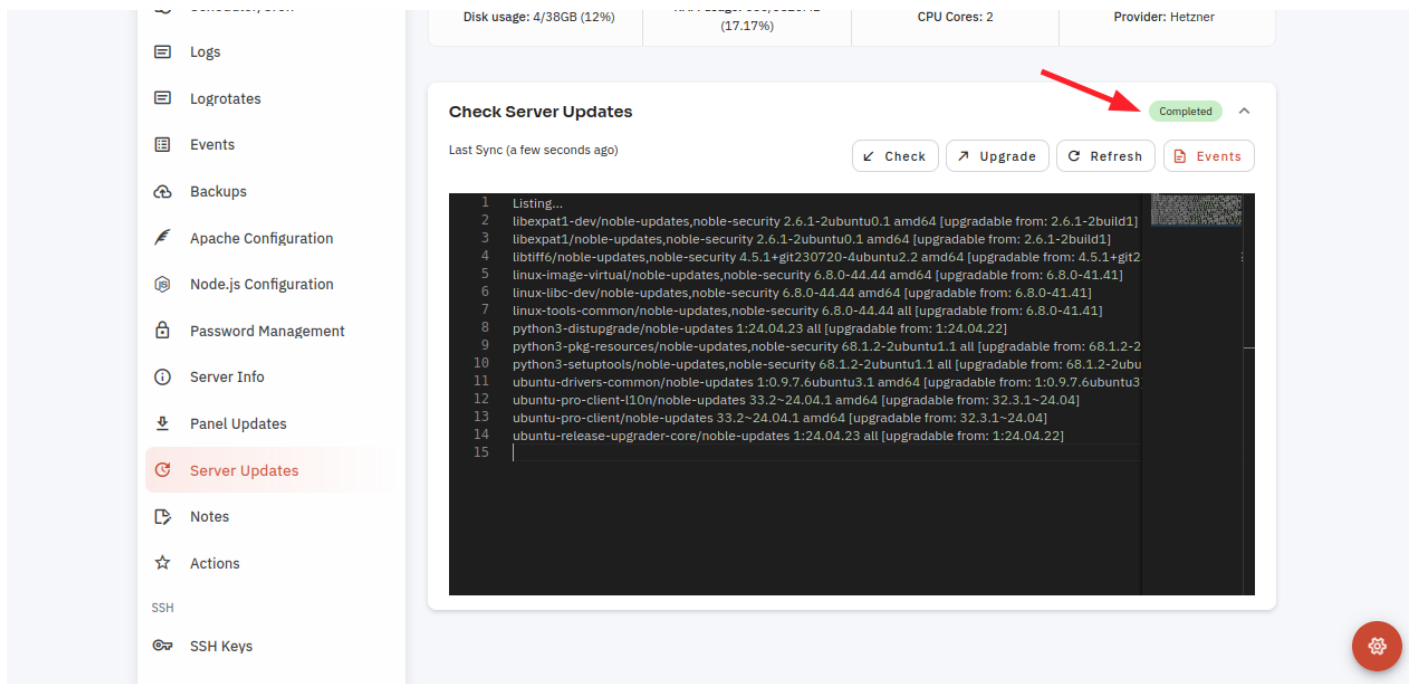

The screenshot shows the 'Check Server Updates' panel in a server management interface. The left sidebar contains various system management options, with 'Server Updates' highlighted. The main panel displays system statistics (Disk usage: 4/38GB, RAM usage: 656/3820MB, CPU Cores: 2, Provider: Hetzner) and a list of 15 packages that can be upgraded. A red arrow points to the 'Upgrade' button in the top right corner of the panel.

Package	Current Version	Upgradeable From
libexpat1-dev/noble-updates,noble-security	2.6.1-2ubuntu0.1 amd64	[upgradable from: 2.6.1-2build1]
libexpat1/noble-updates,noble-security	2.6.1-2ubuntu0.1 amd64	[upgradable from: 2.6.1-2build1]
libtiff6/noble-updates,noble-security	4.5.1+git230720-4ubuntu2.2 amd64	[upgradable from: 4.5.1+git230720-4ubuntu2.2]
linux-image-virtual/noble-updates,noble-security	6.8.0-44.44 amd64	[upgradable from: 6.8.0-41.41]
linux-libc-dev/noble-updates,noble-security	6.8.0-44.44 amd64	[upgradable from: 6.8.0-41.41]
linux-tools-common/noble-updates,noble-security	6.8.0-44.44 all	[upgradable from: 6.8.0-41.41]
python3-distupgrade/noble-updates	1:24.04.23 all	[upgradable from: 1:24.04.22]
python3-pkg-resources/noble-updates,noble-security	68.1.2-2ubuntu1.1 all	[upgradable from: 68.1.2-2ubuntu1.1]
python3-setuptools/noble-updates,noble-security	68.1.2-2ubuntu1.1 all	[upgradable from: 68.1.2-2ubuntu1.1]

ubuntu-pro-client-l10n/noble-updates	33.2~24.04.1 amd64	[upgradable from: 32.3.1~24.04]
ubuntu-pro-client/noble-updates	33.2~24.04.1 amd64	[upgradable from: 32.3.1~24.04]
ubuntu-release-upgrader-core/noble-updates	1:24.04.23 all	[upgradable from: 1:24.04.22]

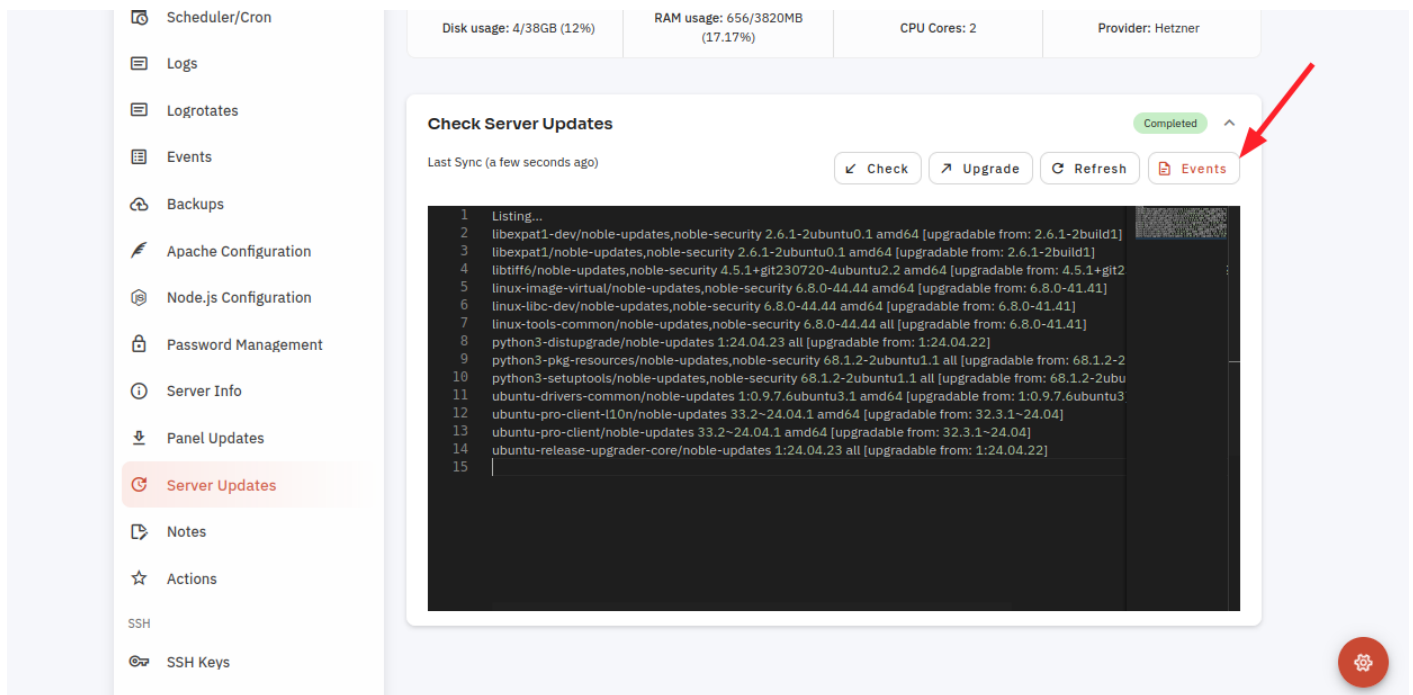

4. Click on the Upgrade button, if an update is available.

This screenshot is similar to the first one, but the 'Upgrade' button is highlighted with a red arrow, indicating the next step in the process. The list of packages and their upgradeable versions remains the same.

Here you can see the server upgrade successfully.

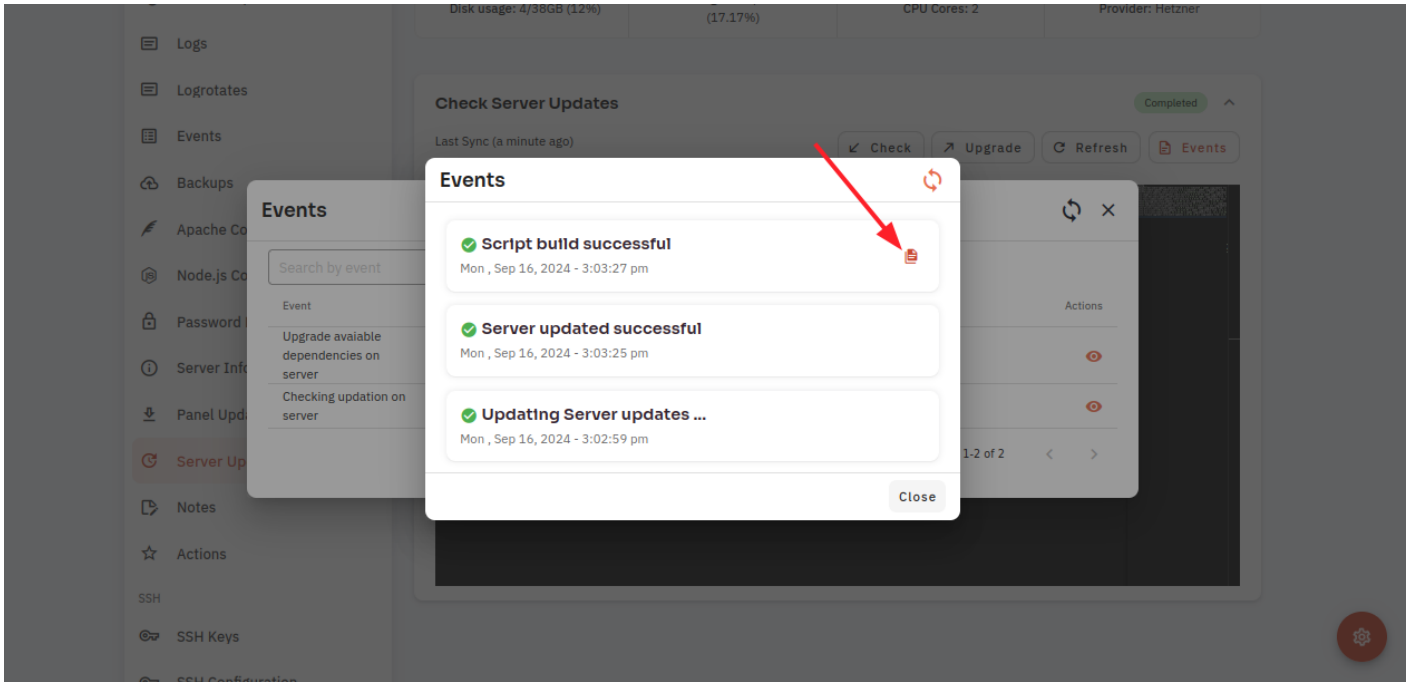

5. Click on the Event Button.

6. Click on the Eye button.

7. Click on the File Button.

Here you can see the Event data.
