

# How to check Site php logs through the cloudpanzer website?

If you're having issues with your PHP-based website, one of the first places you should look for clues is the PHP logs. These logs can provide valuable information about any errors or issues that are occurring on your site, as well as help you troubleshoot and fix any problems.

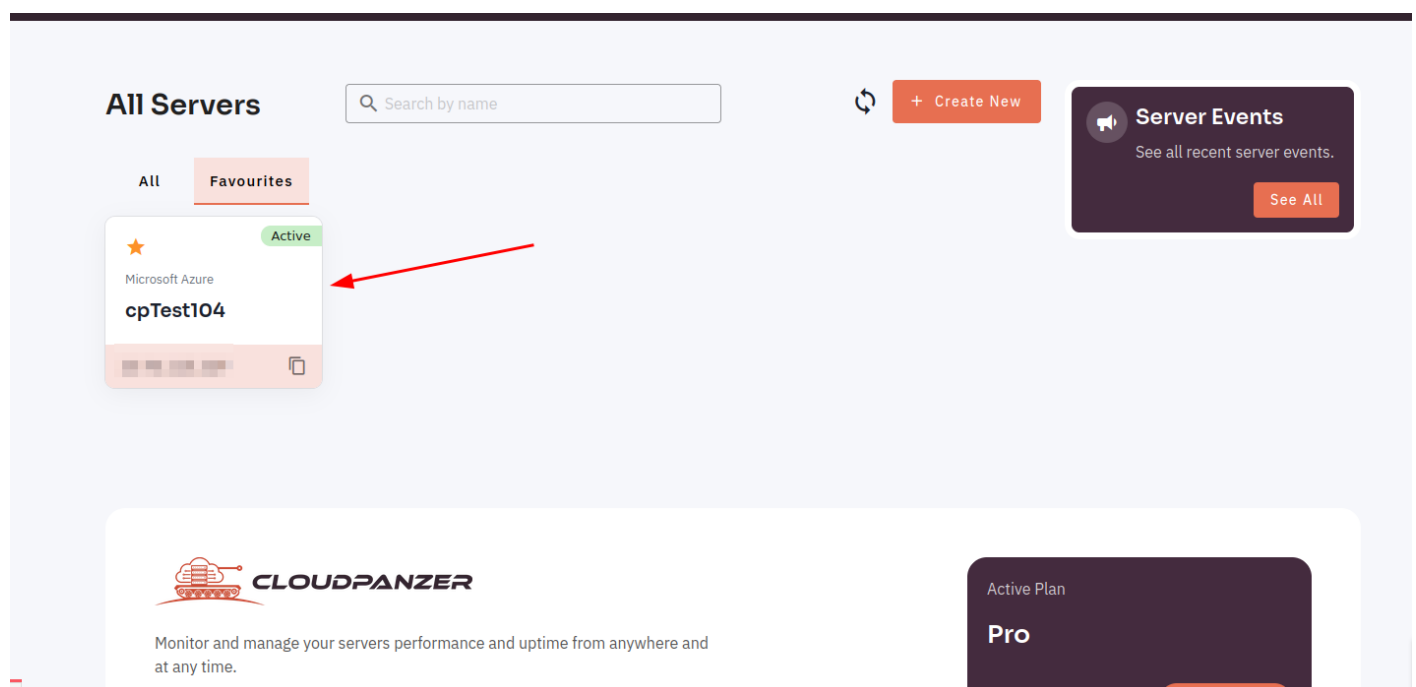

## Tutorial :

**You can watch the Video or Continue reading the post.**

Follow the steps below to check php logs site

1. Select Server of your choice.

2. Select the Sites option.

The screenshot shows the CloudPanzer dashboard. On the left sidebar, the 'Sites' option is highlighted with a red box and a red arrow. The main content area displays the 'cpTest60' site details, including its status (Active), uptime, and resource usage. Below this, the 'Active Sites' section shows a table with one entry: 'appleweb.testaccount.boats'.

Domain	App	PHP	Status	User	SSH	Isolated
appleweb.testaccount.boats	gear icon	php8.1	Installed	applewebtestaccountboats	terminal icon	Yes

3. Select the Active site. Click on Logs Option.

The screenshot shows the CloudPanzer dashboard. The 'Active Sites' table is visible, and a red arrow points to the 'appleweb.testaccount.boats' entry. The table has columns for Domain, App, PHP, Status, User, SSH, and Isolated.

Domain	App	PHP	Status	User	SSH	Isolated
appleweb.testaccount.boats	gear icon	php8.1	Installed	applewebtestaccountboats	terminal icon	Yes

4. Click on the PHP button.
