

How to create Redirect Rules through the Cloudpanzer website?

Creating redirect rules can be a useful tool for managing your website and improving the user experience. A redirect is a way to send users and search engines to a different URL than the one they originally requested.

Prerequisites :

You must have an Active Server and Active Site. You can jump to the tutorial section if the above conditions are proper, Or first follow the links below to set up the prerequisites.

How to install a Server

How to Setup a Site

Tutorial :

You can watch the Video or Continue reading the post.

Follow the steps below to Create Redirect Rules.

Navigate to the Redirect Rules

(Use this link to view How to Navigate).

5: Then, click on the Add New Button to create Redirect Rules.

The screenshot shows the CloudPanzer dashboard for a site named 'demo2.testaccount.boats'. The 'Redirect Rules' section is active, displaying a table with columns: From, To, Type, Status, Events, and Actions. The table is currently empty with the message 'No data available'. A red arrow points to the '+ Add New' button in the top right corner of the Redirect Rules section.

demo2.testaccount.boats **php8.2** **Server Mode: Apache** **Created At: 29-08-2023 - 10:52 am**

Disk usage: N/A SSH: ssh Basepath: /home/demo2testaccountboats /demo2.testaccount.boats/public

Redirect Rules **+ Add New**

Search by domain

From	To	Type	Status	Events	Actions
No data available					

Rows per page: 10

6: Fill in all the fields and click on Save Changes Button.

The screenshot shows the CloudPanzer dashboard with the 'Redirect Rule' dialog box open. The dialog box has fields for 'From' (abc), 'To' (abc2), and 'Type' (Temporary). A red arrow points to the 'Save Changes' button in the bottom right corner of the dialog box.

Redirect Rule

From: abc To: abc2

Type: Temporary

Close **Save Changes**

Here, you can see the redirect Rule created successfully.
