

How to create Website on CloudFlare?(pending)

Cloudflare is a cloud-based service that helps improve the security and performance of your website. It offers a range of features including DDoS protection, content delivery network (CDN) services, and website optimization tools.

Follow the steps below to check Cloudflare Websites.

Navigate to the Home Page of CloudFlare(Use this link to view How to Navigate).

1. Click on your Account.

The screenshot displays the CloudPanzer dashboard. At the top, there is a navigation bar with the CloudPanzer logo and menu items: Servers, Sites, Billing, Groups, and Integrations. A user profile icon labeled 'Demo2' is visible in the top right. The main content area is divided into several sections. On the left, there is a 'CLOUDFLARE' account summary card showing 'Total Account: 1' and 'Account: Jane's Account' with a 'Switch Account' button. The central part features an 'All Accounts' table with a search bar and a refresh icon. The table has columns for Email, Type, and Date. A single row is visible with the email 'Cf@testaccount.live's Account', type 'standard', and date '16-01-2023 - 1:12 pm'. A red arrow points to this row. Below the table, there are pagination controls showing 'Rows per page: 50' and '1-1 of 1'. At the bottom, there is a 'CLOUDPANZER' logo and a description: 'Monitor and manage your servers performance and uptime from anywhere and at any time.' To the right, there is a 'Pro' plan card with an 'Upgrade Now' button.

2. Click on the "add new" button.

Jane's Account / Cf@testaccount.live's Account / Zone

Account: Jane's Account
