How to edit a Redirect Rules through the cloudpanzer website?

Redirect rules allow you to specify how a web server should respond when a user requests a specific page or resource. These rules can be used to redirect users to a new location or to display a specific page or resource in response to a request.

Prerequisites :

You must have an Active Server and Active Site. You can jump to the tutorial section if the above conditions are proper, Or first follow the links below to set up the prerequisites.

How to install a Server

How to Setup a Site

Tutorial :
