

# How to Edit DNS Record?

Editing a DNS record can be a useful way to manage your domain name and website.

## Tutorial :

**You can watch the Video or Continue reading the post.**

<https://www.youtube.com/embed/LDMCkmsa9fw>

Follow the steps below to Edit DNS records.

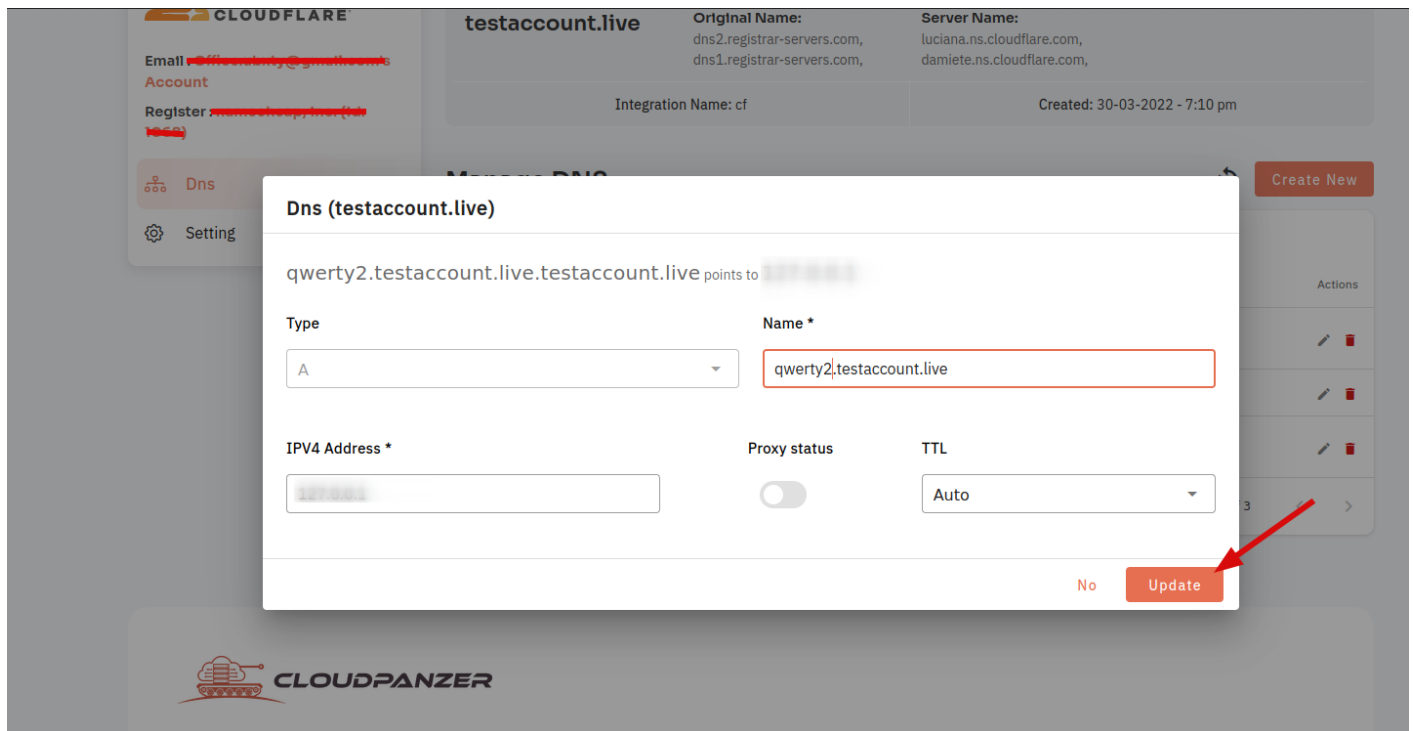

**Navigate to the DNS Dashboard (Use this link to view How to Navigate)**

1. Click on the Edit icon.

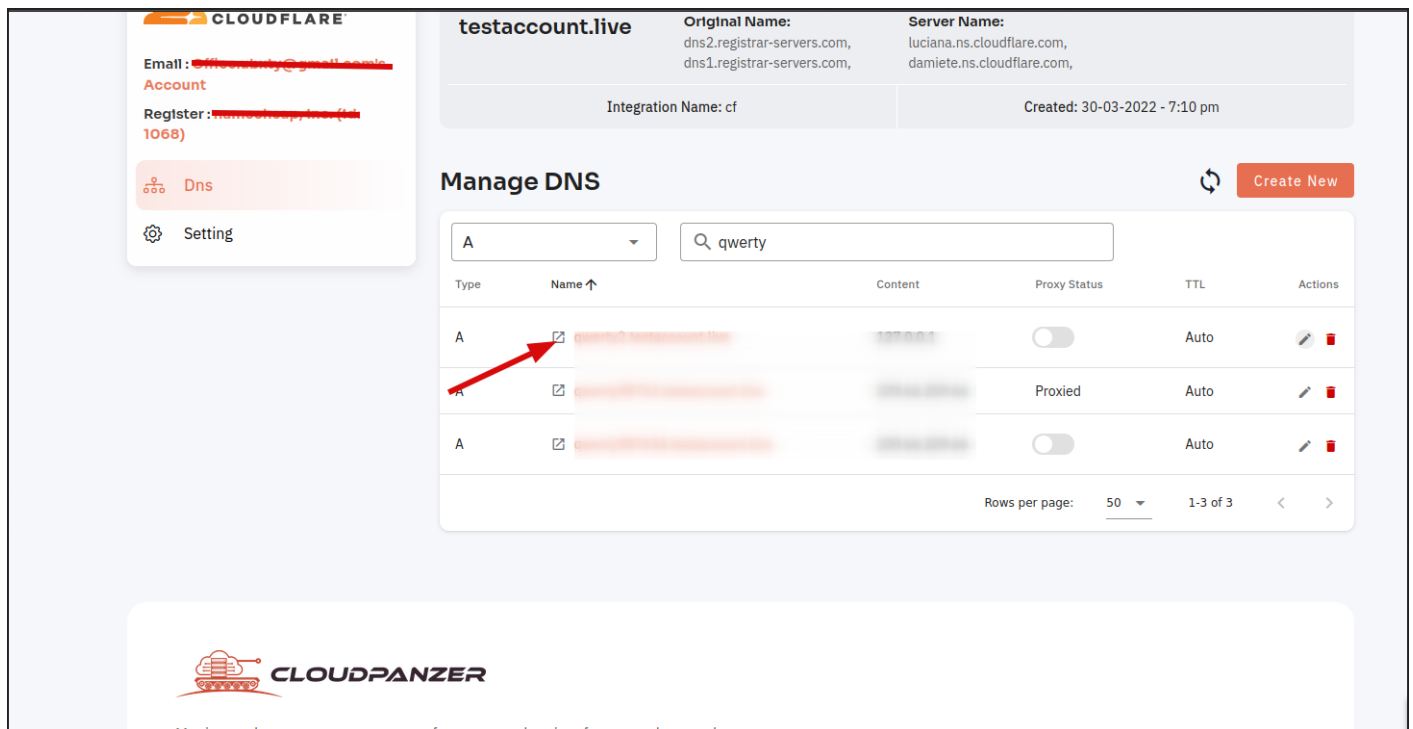

The screenshot displays the Cloudflare DNS management interface for the domain **testaccount.live**. The top section shows domain details: Original Name (dns2.registrar-servers.com, dns1.registrar-servers.com), Server Name (luciana.ns.cloudflare.com, damiete.ns.cloudflare.com), Integration Name (cf), and Created date (30-03-2022 - 7:10 pm). Below this is the 'Manage DNS' section, which includes a dropdown menu set to 'A', a search bar with 'qwerty', and a table of DNS records. The table has columns for Type, Name, Content, Proxy Status, TTL, and Actions. A red arrow points to the 'Edit' icon (a pencil) in the Actions column of the first record. The bottom of the page features the CloudPanzer logo and tagline.

Type	Name ↑	Content	Proxy Status	TTL	Actions
A			<input type="checkbox"/>	Auto	 
A			Proxied	Auto	 
A			<input type="checkbox"/>	Auto	 

2. After Changes Click on the "Update" button.

You can see information is updated Successfully.
