

How to Edit Manage Backups?

Follow the steps below to Edit Manage Backups.

Navigate to the Edit Manage Backups.

(Use this link to view How to Navigate).

3. Click on the Edit Icon.

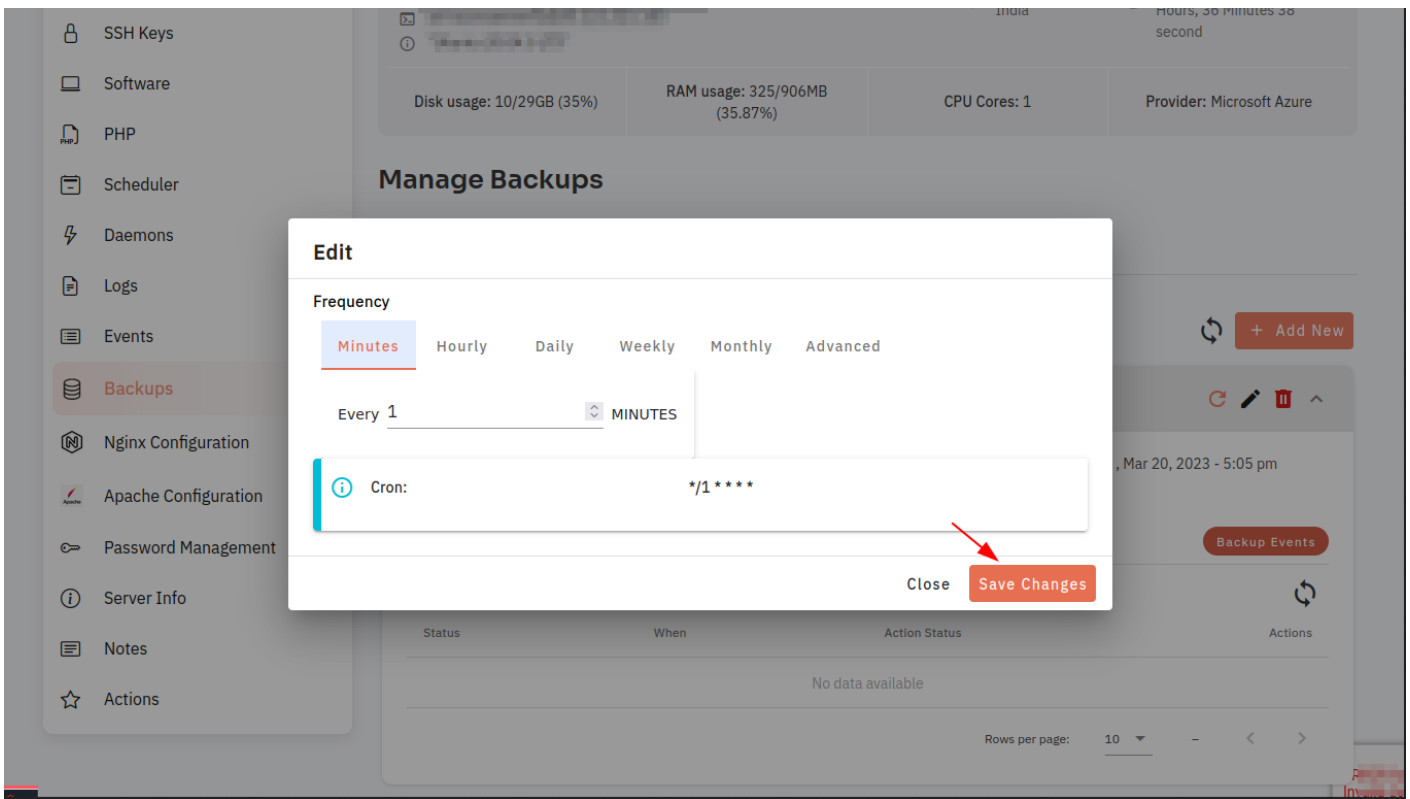

The screenshot displays the 'Manage Backups' interface. On the left is a sidebar menu with options: SSH Keys, Software, PHP, Scheduler, Daemons, Logs, Events, Backups (highlighted), Nginx Configuration, Apache Configuration, Password Management, Server Info, Notes, and Actions. The main content area has a top status bar showing 'India' and 'Hours, 35 Minutes 13 second'. Below this is a resource usage table:

| Disk usage: 10/29GB (35%) | RAM usage: 325/906MB (35.87%) | CPU Cores: 1 | Provider: Microsoft Azure |
|---------------------------|-------------------------------|--------------|---------------------------|
| | | | |

The 'Manage Backups' section has three tabs: 'Backups' (active), 'Destinations', and 'Archived Backup Files'. Under the 'Backups' tab, there's a '+ Add New' button and a list of backup profiles. One profile is shown with details: Frequency: */1 ****, Status: Completed, When: Mon, Mar 20, 2023 - 5:05 pm, Databases: samDB, Sites: azure.testaccount.live. An edit icon (pencil) is highlighted with a red arrow. Below the profile details is a 'Backup Events' button and a 'Backups Logs' section with a table header (Status, When, Action Status, Actions) and a 'No data available' message. At the bottom right, there's a 'Rows per page: 10' dropdown and navigation arrows.

4. Show the Edit Dialog and Click on the Save Changes Button.

5. Here you can see Edit Manage Backups are successful.
