

How to Edit Supervisor Conf in Daemons on a server through the CloudPanzer website?

The Supervisor daemon is a process control system that allows you to control and monitor processes on your system. It is often used to manage long-running processes, such as web servers or database servers.

Prerequisites :

You must have an Active Server. You can jump to the tutorial section if the above conditions are proper, Or first follow the links below to set up the prerequisites.

How to install a Server

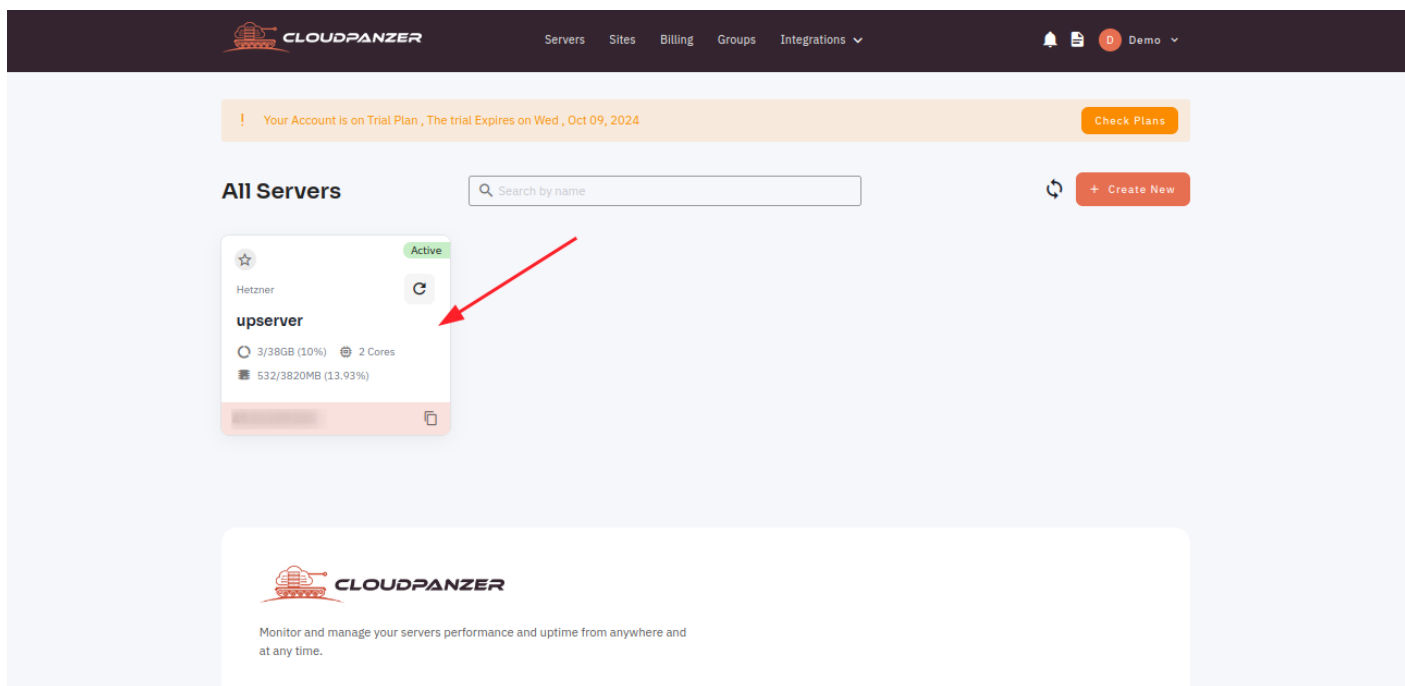

Tutorial :

You can watch the Video or Continue reading the post.
