4. Select the PHP Config option.

The screenshot shows the Cloudpanzer dashboard for a site named 'apple.testaccountboats'. The left sidebar lists 'SITE TOOLS' including App, Environment, Logs, Logrotates, **PHP Configuration** (highlighted with a red arrow), Nginx Configuration, Node.js Configuration, Password Management, and SSH. The main content area shows site details: 'Last Stats: Wed, Sep 11, 2024 - 10:40 pm', 'php8.2', 'Server Mode: Nginx', and 'Created At: Sep 12, 2024 - 11:10 am'. Below this, the 'PHP Versions' section displays a message: 'You may install additional versions of PHP on the PHP management dashboard.' with a 'Manage' button. It also shows 'Change Site PHP Version' with buttons for 'PHP 8.3' and 'PHP 8.2' (selected), and a 'Restart Current PHP' section with a 'Restart' button. A 'Save Changes' button is at the bottom right.

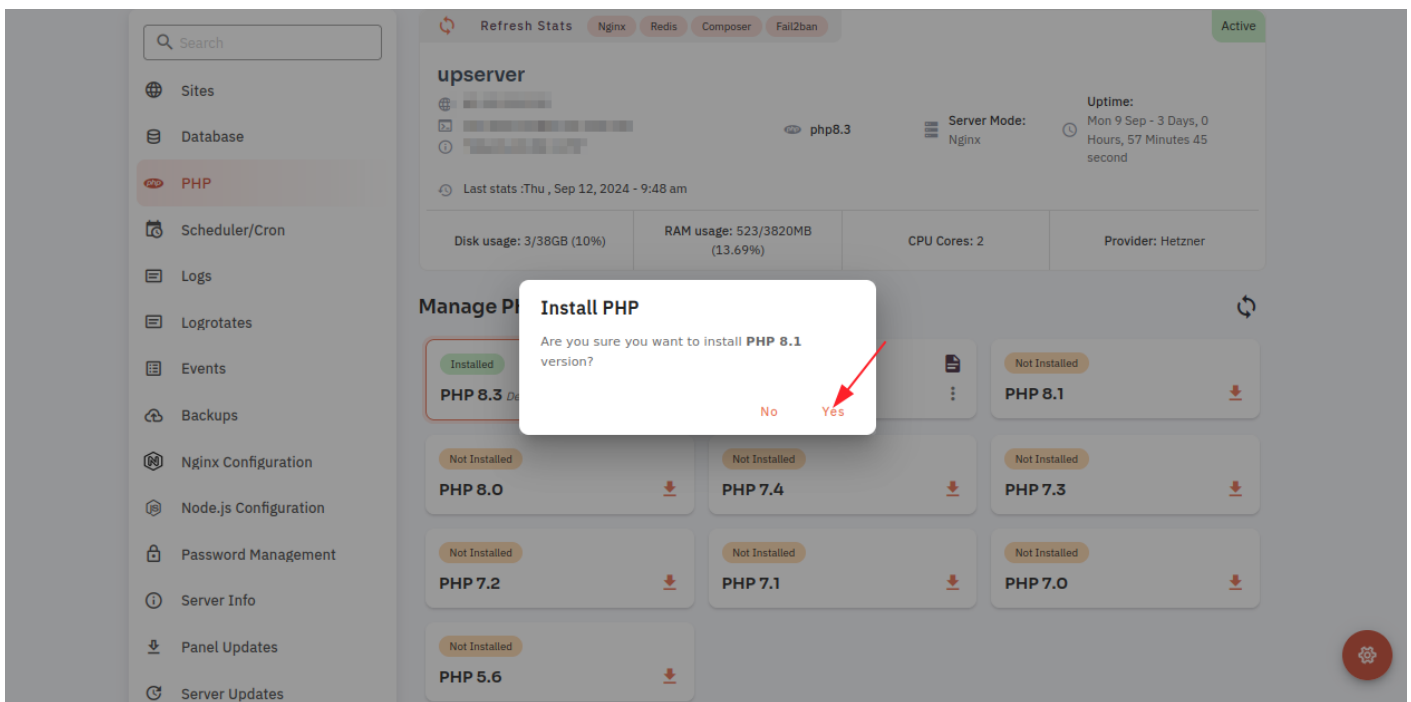

5. Click on the Manage button.

This screenshot shows the 'PHP Versions' management section. A red arrow points to the 'Manage' button in the top right of the section. The section contains a message: 'You may install additional versions of PHP on the PHP management dashboard.' Below this, there are buttons for 'Installed' and 'Events'. The 'Change Site PHP Version' section shows 'PHP 8.3' and 'PHP 8.2' (selected). The 'Restart Current PHP' section has a 'Restart' button. A 'Save Changes' button is at the bottom right.

6. Here, different PHP versions will show. You can click on the install button to install a PHP version.

7. Click on the Yes button.

Here. you can see the PHP version installed successfully.

The screenshot shows the Cloudpanzer dashboard. The sidebar on the left contains a search bar and navigation links: Sites, Database, PHP (highlighted), Scheduler/Cron, Logs, Logrotates, Events, Backups, Nginx Configuration, Node.js Configuration, Password Management, and Server Info. The main panel displays server details for 'upserver' (php8.3) with an 'Active' status. It shows uptime, last stats, and resource usage (Disk, RAM, CPU). Below this is the 'Manage PHP' section, which is a grid of PHP versions. PHP 8.3 is the default and installed version. PHP 8.1 is also installed, highlighted with a red arrow. Other versions (8.0, 7.4, 7.3, 7.2, 7.1, 7.0) are not installed. A red circle with a gear icon is visible in the bottom right corner.
