

How to install Adminer on a domain through the cloudpanzer website?

Adminer is a popular open-source database management tool that can be used to manage databases through a simple and user-friendly interface. Installing Adminer on your website is a simple process that requires just a few steps.

How to install a Server

How to Setup a Site

How to Navigate to Apps Under Website

Follow the steps below to install Adminer.

1. Click on Adminer.

The screenshot displays the CloudPanzer website management interface. On the left, there is a 'Site Tools' sidebar with various options like 'App', 'Command', 'Environment', 'SSL', 'Redirects', 'Events', 'Logs', 'Nginx Configuration', 'Apache Configuration', 'PHP Configuration', 'Shell Settings', 'Actions', 'Password Management', and 'Site Meta'. The main content area shows the 'Site App' section for the domain 'cp7sitetest.testaccount.live'. It includes a 'Refresh Stats' button, a status indicator 'Installed', and a 'Generate' button. Below this, there is a grid of application tiles: 'Git Repository', 'Wordpress', 'PhpMyAdmin', 'Custom', 'Opencart', 'Prestashop', and 'Adminer'. The 'Adminer' tile is highlighted with a red box and a red arrow pointing to it. At the bottom, there is an 'Install Adminer' button.

2. Select an Adminer Version. and click on Install Adminer.

Here, you can see the installation of Adminer was successful.
