

How to Navigate Site Meta through the Cloudpanzer website?

Follow the steps below to change the Navigate Site Meta.

1: Firstly you are logged in, look for a "Server" and click on it.

2. Select the Site Option and Click on Active Site.

The screenshot shows the Cloudpanzer dashboard. At the top, there is a navigation bar with the Cloudpanzer logo and menu items: Servers, Sites, Billing, Groups, Integrations, and a Demo dropdown. A search bar is located in the top left. On the left side, there is a sidebar menu with various options, including 'Sites', which is highlighted with a red arrow. The main content area displays server statistics for 'cpTest102', including IP address (20.121.218.164), SSH access, and resource usage (Disk: 5/29GB, RAM: 303/843MB, CPU: 1 core). Below this, there is a table of 'Active Sites' with columns for Domain, App, PHP, Status, User, SSH, and Isolated. Two sites are listed for the domain 'demo2.testaccount.boats': one with PHP 8.2 (Installed) and one with PHP 8.1 (Completed). A red arrow points to the 'demo2.testaccount.boats' entry in the table.

3. Select the Site Meta Option.

The screenshot shows the 'Site Meta' configuration page in Cloudpanzer. The left sidebar menu is visible, with 'Site Meta' highlighted by a red arrow. The main content area shows configuration options for the site. At the top, there are fields for 'Disk usage: N/A', 'SSH: ssh', and 'Basepath: /home/demo2testaccountboats/demo2.testaccount.boats/public'. Below this, the 'Site Domain' section contains a warning message: 'Domain updates are primarily intended for site still under development - not production sites. if the domain is changed, you will need to create and activate a certificate that include all if this site domains and aliases.' The 'Site Domain' input field contains 'demo2.testaccount.boats'. There is a checked checkbox for 'Allow Wildcard Sub-Domains.' and a 'Save Changes' button. Below the 'Site Domain' section, there are expandable sections for 'Web Directory', 'Aliases', and 'Maintenance Mode'.
