

How to Navigate to the Site Environment From Dashboard ?

In the context of a domain, "site environment" refers to the digital or online aspects of a website or web application, including hosting, design, content, security, performance, and user experience. It encompasses everything related to the domain's online presence and functionality.

Follow the steps below Navigate to the Site Environment.

1: Click on the Server.

2. Select the site whose environments you want to check.

The screenshot shows the CloudPanzer dashboard. The top navigation bar includes 'Servers', 'Sites', 'Billing', 'Groups', and 'Integrations'. The main content area displays server statistics for 'cpTest102', including disk usage (5/29GB), RAM usage (303/843MB), CPU cores (1), and provider (Microsoft Azure). Below this is a table of 'Active Sites' with columns for Domain, App, PHP, Status, User, SSH, and Isolated. A red arrow points to the 'demo.testaccount.boats' entry in the table.

Domain	App	PHP	Status	User	SSH	Isolated
demo2.testaccount.boats	phpMyAdmin	php8.2	Completed	demo2testaccountboats		Yes
demo.testaccount.boats	WordPress	php8.1	Completed	demotestaccountboats		Yes

3. Select the Environment Option.

The screenshot shows the CloudPanzer dashboard with the 'Site Tools' sidebar on the left. The 'Environment' option is highlighted with a red arrow. The main content area displays the configuration for the 'demo.testaccount.boats' site, including server mode (Apache), PHP version (php8.1), and various configuration options like 'Site App', 'Php Info', and 'PhpMyAdmin Info'. A red box highlights the 'Wordpress' app icon.
