

How to perform different operations on a php my Admin Site Environment?

In the context of a domain, "site environment" refers to the digital or online aspects of a website or web application, including hosting, design, content, security, performance, and user experience. It encompasses everything related to the domain's online presence and functionality.

Prerequisites :

You must have installed the App on the site. You can jump to the tutorial section if the above conditions are proper, Or first follow the links below to set up the prerequisites.

How to install a Server

How to Setup a Site

Navigate to the site Dashboard

Use this link to view How to Navigate

Select an Environment Options.

The screenshot shows the CloudPanzer dashboard. On the left, the 'Site Tools' sidebar has 'Environment' highlighted with a red arrow. The main area shows the configuration for 'demo.testaccount.boats'. Under 'Site Environment', the 'Basic' tab is active, and the 'Generate .Env' button is visible.

1. Backup :

1.1 Click on the Backup button.

The screenshot shows the CloudPanzer dashboard for 'demo1.testaccount.boats'. In the 'Site Environment' section, the 'Advance' tab is selected, and the 'Backup' button is highlighted with a red arrow. The code editor shows the beginning of a PHP configuration file.

1.2 Here you can see backups have been shown successfully.

The screenshot shows the CloudPanzer Site Tools interface. On the left is a sidebar with 'Site Tools' and a search bar. Below the search bar are menu items: App, Environment (highlighted), SSL, Redirects, Events, Logs, Nginx Configuration, PHP Configuration, Node.js Configuration, Shell Settings, Password Management, Site Meta, and Actions. The main panel displays the 'demo1.testaccount.boats' site. At the top, it shows 'Refresh Stats', 'Installed' status, 'php8.2' version, 'Server Mode: Nginx', and 'Created At: 31-08-2023 - 3:27 pm'. Below this, it shows 'Disk usage: N/A', 'SSH: ssh', and 'Basepath: /home/demo1testaccountboats /demo1.testaccount.boats/public'. The 'Site Environment' section is expanded, showing 'Environment Backups'. A table lists backups with columns: Filename, Date, Mode, and Actions. One backup is listed: 'site_environment_2023-08-31-10:12:12.bkp' with date 'Thu, Aug 31, 2023 - 3:42 pm' and mode 'custom'. A red arrow points to the filename. At the bottom right of the table, it says 'Rows per page: 10' and '1-1 of 1'.

2. Pull :

2.1 Click on the pull button to fetch data.

The screenshot shows the CloudPanzer Site Tools interface. On the left is a sidebar with 'Site Tools' and a search bar. Below the search bar are menu items: App, Environment (highlighted), SSL, Redirects, Events, Logs, Nginx Configuration, PHP Configuration, Node.js Configuration, Shell Settings, Password Management, Site Meta, and Actions. The main panel displays the 'demo1.testaccount.boats' site. At the top, it shows 'Refresh Stats', 'Installed' status, 'php8.2' version, 'Server Mode: Nginx', and 'Created At: 31-08-2023 - 3:27 pm'. Below this, it shows 'Disk usage: N/A', 'SSH: ssh', and 'Basepath: /home/demo1testaccountboats /demo1.testaccount.boats/public'. The 'Site Environment' section is expanded, showing 'Path (/home/demo1testaccountboats/demo1.testaccount.boats/public/config.inc.php)' and 'Last Sync (4 minutes ago)'. Below the path, there are tabs for 'Basic' and 'Advance'. A red arrow points to the 'Pull' button in the action bar. The action bar also contains 'Backup', 'Push', 'Refresh', and 'Events' buttons. Below the tabs, there is a code editor showing PHP configuration code.

3. Push :

3.1 You can make changes here and click the Push button to save.

The screenshot shows the CloudPanzer dashboard. On the left is a 'Site Tools' sidebar with options like App, Environment (selected), SSL, Redirects, Events, Logs, Nginx Configuration, PHP Configuration, Node.js Configuration, Shell Settings, and Password Management. The main area displays the 'demo1.testaccount.boats' site environment. At the top, it shows 'Refresh Stats', 'Installed' status, and site details: php8.2, Server Mode: Nginx, Created At: 31-08-2023 - 3:27 pm. Below this are 'Disk usage: N/A', 'SSH: ssh', and 'Basepath: /home/demo1testaccountboats/demo1.testaccount.boats/public'. The 'Site Environment' section shows the path '/home/demo1testaccountboats/demo1.testaccount.boats/public/config.inc.php' and 'Last Sync (4 minutes ago)'. A row of buttons includes 'Backup', 'Pull', 'Push' (highlighted with a red arrow), 'Refresh', and 'Events'. Below the buttons is a code editor showing PHP configuration code.

4. Refresh :

4.1 Click on the refresh button to refresh the site environment.

This screenshot is similar to the first one, showing the CloudPanzer dashboard for the 'demo1.testaccount.boats' site. The 'Refresh' button in the 'Site Environment' section is now highlighted with a red arrow. The 'Push' button is no longer highlighted. The rest of the interface, including the sidebar and site details, remains the same.

5. Check Events:

5.1 Click on the Events button to view events in the site environment.
