

How to perform different operations on a php my Admin Site Environment?

In the context of a domain, "site environment" refers to the digital or online aspects of a website or web application, including hosting, design, content, security, performance, and user experience. It encompasses everything related to the domain's online presence and functionality.

Prerequisites :

You must have installed the App on the site. You can jump to the tutorial section if the above conditions are proper, Or first follow the links below to set up the prerequisites.

How to install a Server

How to Setup a Site

How To Install PHPMy Admin App on Domain.

Tutorial :

Navigate to the site Dashboard

Use this link to view How to Navigate

Select an Environment Options.

The screenshot shows the CloudPanzer dashboard. On the left, the 'Site Tools' sidebar is visible with a search bar and a list of tools: App, Environment (highlighted with a red arrow), SSL, Redirects, Events, Logs, Nginx Configuration, PHP Configuration, Node.js Configuration, Shell Settings, and Password Management. The main content area displays the 'demo.testaccount.boats' site. It includes a 'Refresh Stats' button, a status bar with 'php8.2', 'Server Mode: Nginx', and 'Created At: 31-08-2023 - 10:55 am'. Below this, there's a 'Site Environment' section with a path '/home/demotestaccountboats/demo.testaccount.boats/public/.env' and a 'Last Sync (7 hours ago)' timestamp. The 'Basic' tab is active, showing a dark editor area. Buttons for 'Generate .Env', 'Pull', 'Refresh', and 'Events' are visible.

1. Backup :

1.1 Click on the Backup button.

This screenshot shows the CloudPanzer dashboard for the 'demo1.testaccount.boats' site. The 'Site Tools' sidebar on the left is the same as in the previous image. The main content area shows the 'demo1.testaccount.boats' site with a status bar indicating 'php8.2', 'Server Mode: Nginx', and 'Created At: 31-08-2023 - 3:27 pm'. The 'Site Environment' section displays the path '/home/demo1testaccountboats/demo1.testaccount.boats/public/config.inc.php' and 'Last Sync (a few seconds ago)'. The 'Basic' tab is active, showing a code editor with PHP configuration code. A red arrow points to the 'Backup' button in the top right of the editor area. Other buttons like 'Pull', 'Push', 'Refresh', and 'Events' are also visible.

1.2 Here you can see backups have been shown successfully.

The screenshot shows the CloudPanzer Site Tools interface. On the left is a sidebar with 'Site Tools' and a search bar. Below the search bar are menu items: App, Environment (highlighted), SSL, Redirects, Events, Logs, Nginx Configuration, PHP Configuration, Node.js Configuration, Shell Settings, Password Management, Site Meta, and Actions. The main panel displays the configuration for 'demo1.testaccount.boats'. It includes a 'Refresh Stats' button, a status 'Installed', and details like 'php8.2', 'Server Mode: Nginx', and 'Created At: 31-08-2023 - 3:27 pm'. Below this is the 'Site Environment' section, which contains an 'Environment Backups' table. The table has columns for 'Filename', 'Date', 'Mode', and 'Actions'. A red arrow points to the filename 'site_environment_2023-08-31-10:12:12.bkp'. The table also shows pagination: 'Rows per page: 10' and '1-1 of 1'.

Filename	Date	Mode	Actions
site_environment_2023-08-31-10:12:12.bkp	Thu , Aug 31, 2023 - 3:42 pm	custom	

2. Pull :

2.1 Click on the pull button to fetch data.

This screenshot shows the CloudPanzer Site Tools interface with the 'Site Environment' section expanded. The top navigation bar includes 'Servers', 'Sites', 'Billing', 'Groups', 'Integrations', and a 'Demo' dropdown. The 'Site Environment' section shows the path '/home/demo1testaccountboats/demo1.testaccount.boats/public/config.inc.php' and a 'Last Sync (4 minutes ago)' status. Below the path are two tabs: 'Basic' and 'Advance'. A row of buttons includes 'Backup', 'Pull' (highlighted with a red arrow), 'Push', 'Refresh', and 'Events'. The 'Basic' tab is active, displaying a code editor with PHP configuration code. The code includes comments for 'Servers configuration', 'First server', and 'Authentication type', along with variables like '\$i = 0;', '\$i++;', and '\$cfg['Servers'][\$i]['auth_type'] = 'cookie';'.

3. Push :

3.1 You can make changes here and click the Push button to save.

The screenshot shows the CloudPanzer dashboard. On the left is a 'Site Tools' sidebar with options like App, Environment (selected), SSL, Redirects, Events, Logs, Nginx Configuration, PHP Configuration, Node.js Configuration, Shell Settings, and Password Management. The main area displays the 'demo1.testaccount.boats' site environment. At the top, it shows 'Refresh Stats', 'Installed' status, and site details: php8.2, Server Mode: Nginx, Created At: 31-08-2023 - 3:27 pm. Below this are 'Disk usage: N/A', 'SSH: ssh', and 'Basepath: /home/demo1testaccountboats/demo1.testaccount.boats/public'. The 'Site Environment' section shows the path '/home/demo1testaccountboats/demo1.testaccount.boats/public/config.inc.php' and 'Last Sync (4 minutes ago)'. A row of buttons includes 'Backup', 'Pull', 'Push' (highlighted with a red arrow), 'Refresh', and 'Events'. Below the buttons is a code editor showing PHP configuration code.

4. Refresh :

4.1 Click on the refresh button to refresh the site environment.

This screenshot is similar to the first one, showing the CloudPanzer dashboard for the 'demo1.testaccount.boats' site. The 'Refresh' button in the 'Site Environment' section is now highlighted with a red arrow. The 'Push' button is no longer highlighted. The rest of the interface, including the 'Site Tools' sidebar and site details, remains the same.

5. Check Events:

5.1 Click on the Events button to view events in the site environment.
