

# How to perform different operations on Adminer Site Environment?

In the context of a domain, "site environment" refers to the digital or online aspects of a website or web application, including hosting, design, content, security, performance, and user experience. It encompasses everything related to the domain's online presence and functionality.

## Prerequisites :

You must have installed the App on the site. You can jump to the tutorial section if the above conditions are proper, Or first follow the links below to set up the prerequisites.

**How to install a Server**

**How to Setup a Site**

**How to install Open Cart App On Domain.**

## Tutorial :

**Use this link to view How to Navigate**

Select an Environment Option.

The screenshot shows the Cloudpanzer dashboard. On the left, the 'Site Tools' sidebar has 'Environment' selected, indicated by a red arrow. The main area shows the configuration for 'demo.testaccount.boats'. It includes a 'Refresh Stats' button, a status bar with 'Installed', and a table of server details: PHP 8.2, Nginx, and a created timestamp of 31-08-2023 - 10:55 am. Below this, the 'Site Environment' section shows the path '/home/demotestaccountboats/demo.testaccount.boats/public/.env' and a 'Last Sync (7 hours ago)' status. A 'Basic' tab is active, and a 'Pull' button is visible in the top right of the environment section.

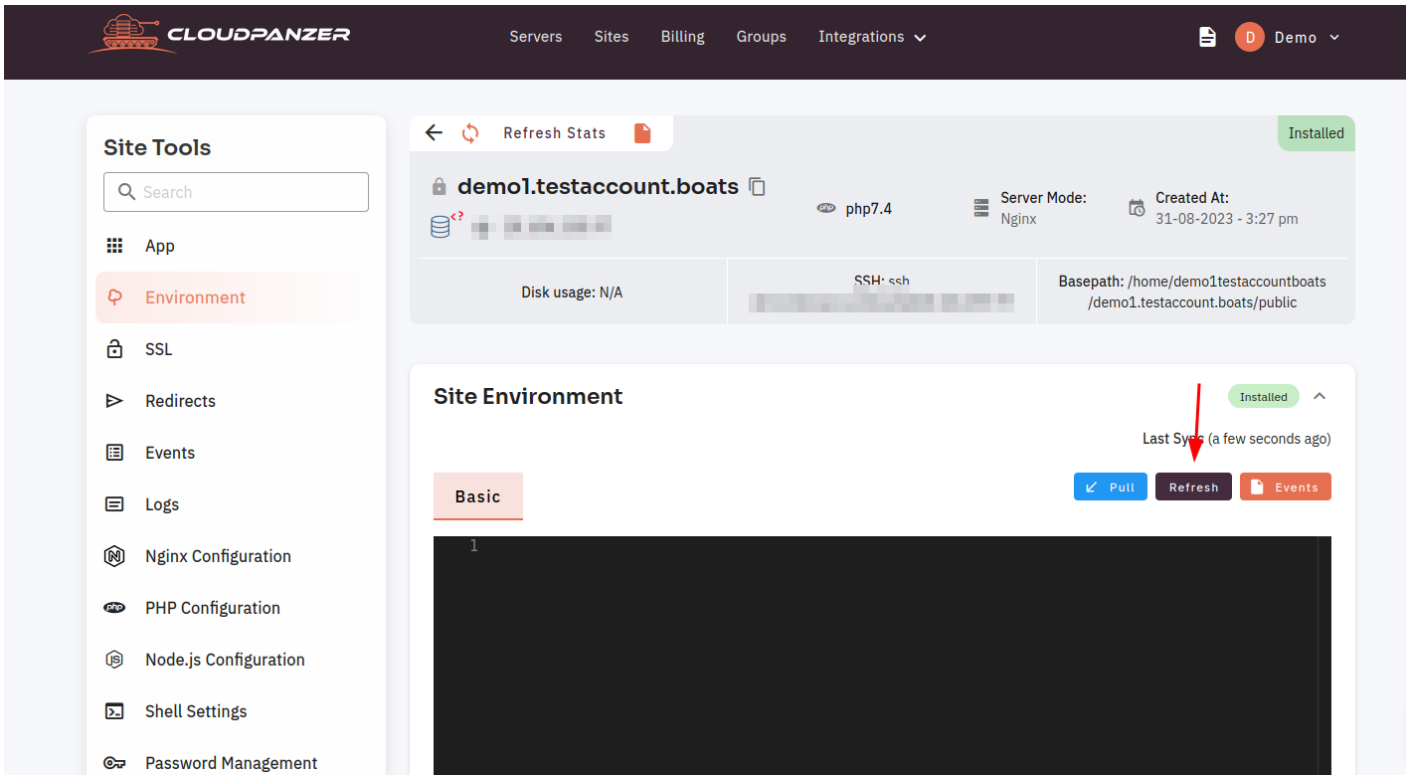

## 1. Pull :

1.1 Click on the pull button to fetch data.

This screenshot shows the same Cloudpanzer dashboard but for a different site, 'demo1.testaccount.boats'. The 'Site Tools' sidebar remains the same. The main panel shows details for this site, including PHP 7.4, Nginx, and a created timestamp of 31-08-2023 - 3:27 pm. In the 'Site Environment' section, the 'Last Sync' status is 'a few seconds ago'. A red arrow points to the 'Pull' button, which is located next to the 'Refresh' and 'Events' buttons.

## 2. Refresh :

2.1 Click on the refresh button to refresh the site environment.

### 3. Events:

3.1 Click on the Events button to check events.
