Click on the "**Purge Everything**" button.

The screenshot shows the Cloudflare dashboard for the account 'testaccount.boats'. The 'Cache' tab is selected, and the 'Purge Cache' section is visible. A red arrow points to the 'Purge Everything' button. The 'Development Mode' section is also visible, with a note that enabling it can increase origin server load. The 'Purge Cache' section includes a note that purging the cache may temporarily degrade performance and increase load on the origin.

Click on the "**Purge Everything**".

Your cache purging successfully.
