[Copy](#)

2. Select the Action Option.

- Scheduler
- Daemons
- Logs
- Events
- Backups
- Nginx Configuration
- Node.js Configuration
- SSH Configuration
- Password Management
- Server Info
- Panel Updates
- Fail2ban
- Notes
- Actions**

This action will fully reboot this server.

[Restart](#)

Delete Protection

This server delete protection is currently disabled.

[Enable](#)

SSH Alerts [Events](#)

If ssh alerts are not working , Click to refresh SSH alerts.

[Refresh](#)

Transfer Server

This action allows you to transfer the ownership of the specified server to another user.

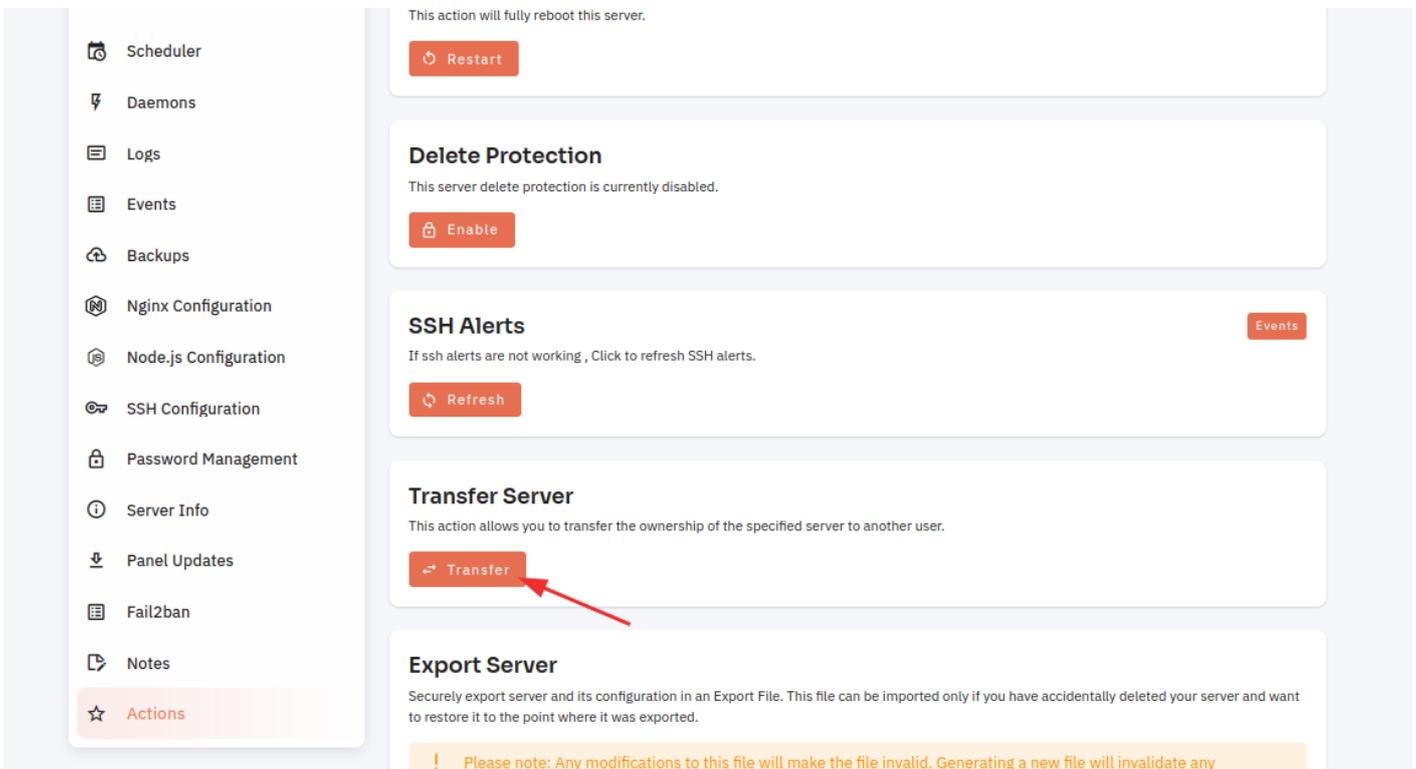

[Transfer](#)

Export Server

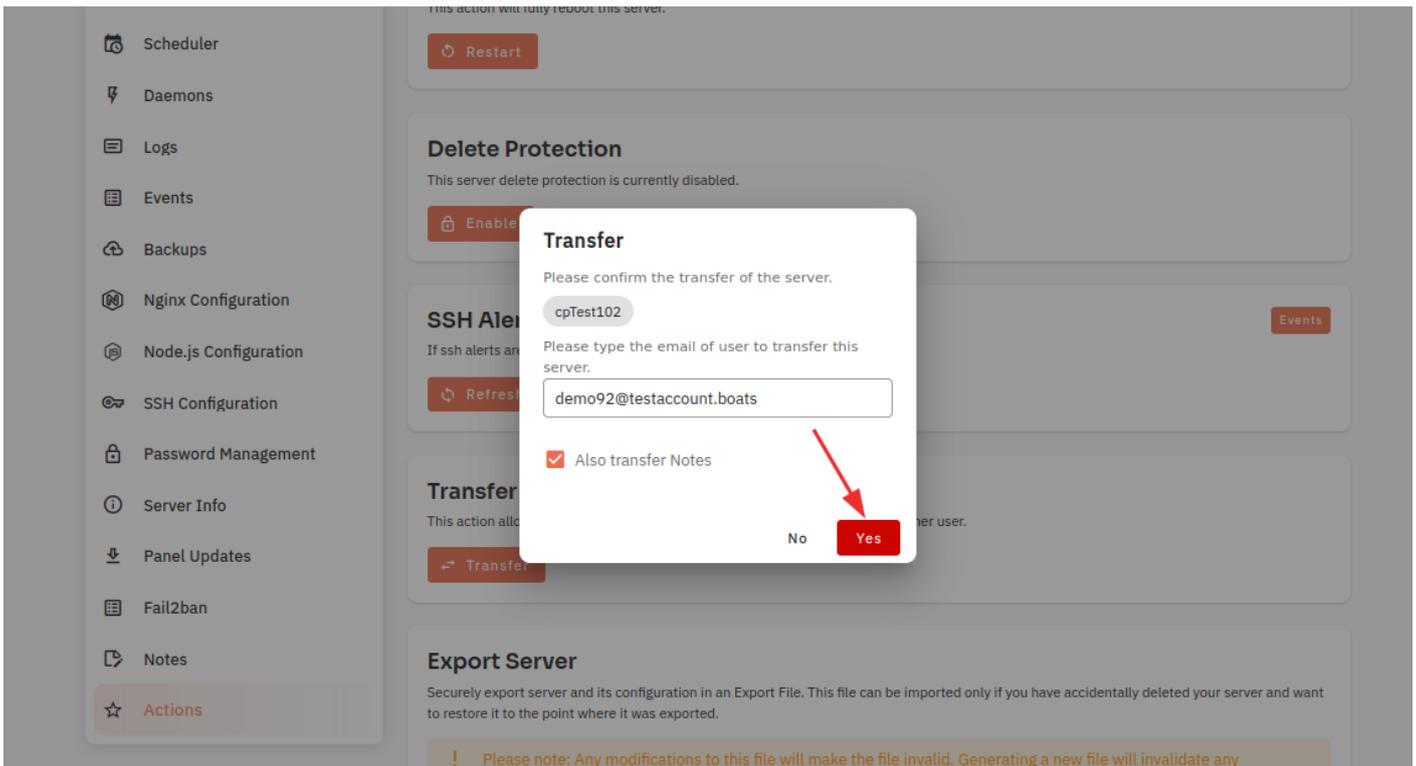

Securely export server and its configuration in an Export File. This file can be imported only if you have accidentally deleted your server and want to restore it to the point where it was exported.

! Please note: Any modifications to this file will make the file invalid. Generating a new file will invalidate any

3: Then, click on the Transfer Button.

4: Enter the email and click on the yes button to transfer the server.

5. Fill in the PIN of that account.

The screenshot shows the CloudPanzer interface with a sidebar menu on the left containing the following items: Scheduler, Daemons, Logs, Events, Backups, Nginx Configuration, Node.js Configuration, SSH Configuration, Password Management, Server Info, Panel Updates, Fail2ban, Notes, and Actions (highlighted with a star). The main content area displays several action cards: 'Restart' (This action will fully reboot this server.), 'Delete Protection' (This server delete protection is currently disabled.), 'SSH Alerts' (If ssh alerts are not working, Click to refresh SSH alerts.), 'Transfer Server' (This action allows you to transfer the ownership of the specified server to another user.), and 'Export Server' (Securely export server and its configuration in an Export File. This file can be imported only if you have accidentally deleted your server and want to restore it to the point where it was exported.). The 'Transfer Server' card is highlighted in orange and contains a warning message: '! This server is already transfer to demo92@testaccount.boats with Pin 5361, Click to cancel.' A red arrow points to this message. A 'Cancel Transfer' button is located below the message.
