

# How to use PHP Built In Extensions ?

PHP provides a variety of built-in extensions that enhance its functionality and allow developers to perform a wide range of tasks. These built-in extensions cover areas such as database access, file manipulation, networking, encryption, and more.

## Follow the steps below to use PHP Built-In Extensions

1. Once you are logged in, look for a "Server" and click on it.

2. Click on the PHP option.

The screenshot shows the CloudPanzer dashboard. The left sidebar contains a search bar and a list of menu items: Sites, Database, PHP (highlighted with a red arrow), Scheduler/Cron, Logs, Logrotates, Events, Backups, Nginx Configuration, Node.js Configuration, Password Management, and Server Info. The main content area is titled 'upserver' and shows server statistics: Disk usage: 3/38GB (10%), RAM usage: 594/3820MB (15.55%), CPU Cores: 2, and Provider: Hetzner. Below this is the 'Manage PHP' section, which displays a grid of PHP versions. The 'PHP 8.2 Default' version is highlighted with a red box, and a red arrow points to its menu icon (three vertical dots).

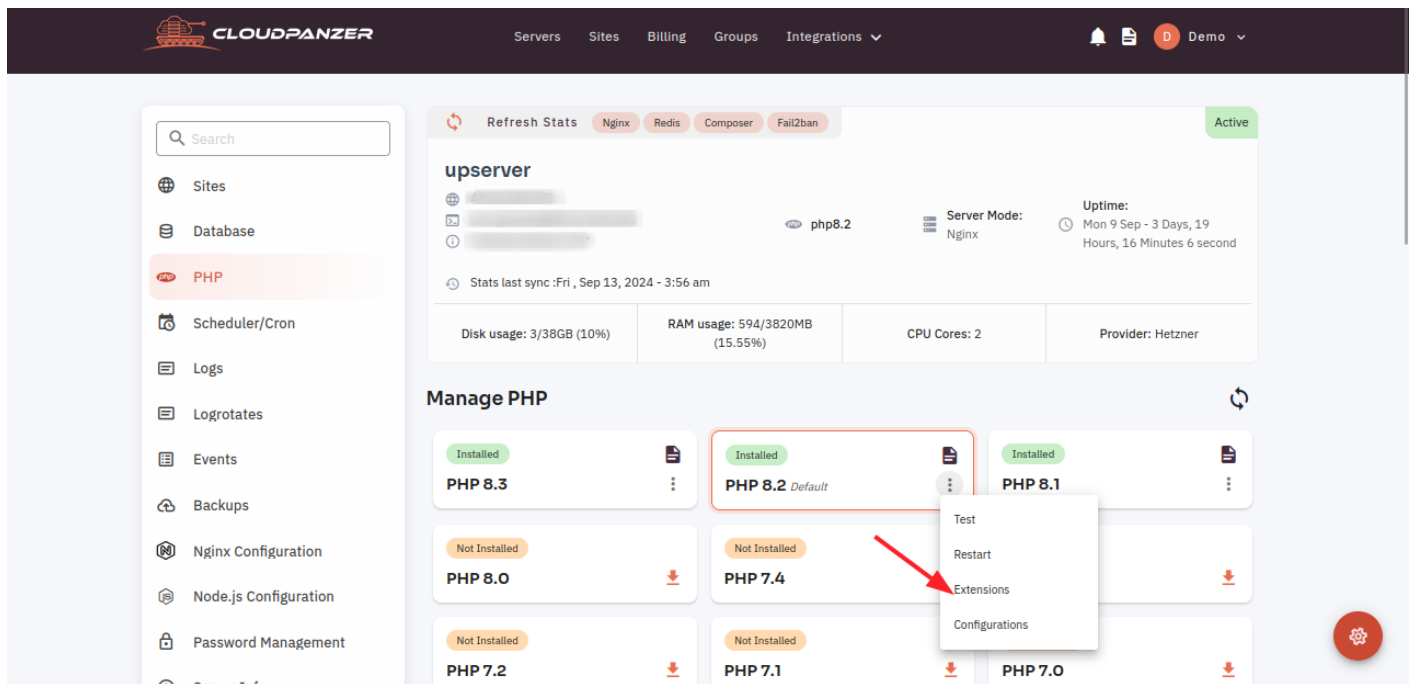

PHP Version	Status	Action
PHP 8.3	Installed	⋮
PHP 8.2 Default	Installed	⋮
PHP 8.1	Installed	⋮
PHP 8.0	Not Installed	Download
PHP 7.4	Not Installed	Download
PHP 7.3	Not Installed	Download
PHP 7.2	Not Installed	Download
PHP 7.1	Not Installed	Download
PHP 7.0	Not Installed	Download

3. Click on the Menu icon.

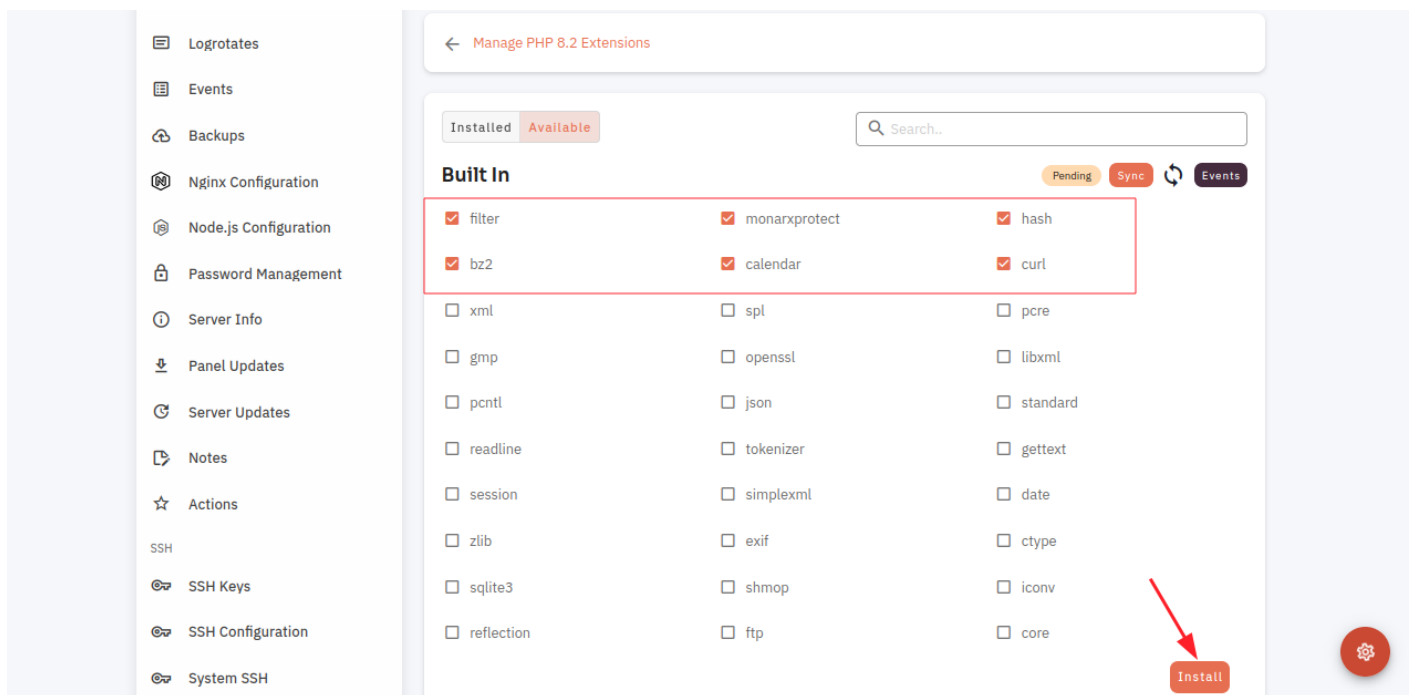

This screenshot is similar to the previous one, but the red arrow now points to the menu icon (three vertical dots) of the 'PHP 8.2 Default' version in the 'Manage PHP' section. The 'PHP' option in the sidebar is still highlighted.

PHP Version	Status	Action
PHP 8.3	Installed	⋮
PHP 8.2 Default	Installed	⋮
PHP 8.1	Installed	⋮
PHP 8.0	Not Installed	Download
PHP 7.4	Not Installed	Download
PHP 7.3	Not Installed	Download
PHP 7.2	Not Installed	Download
PHP 7.1	Not Installed	Download
PHP 7.0	Not Installed	Download

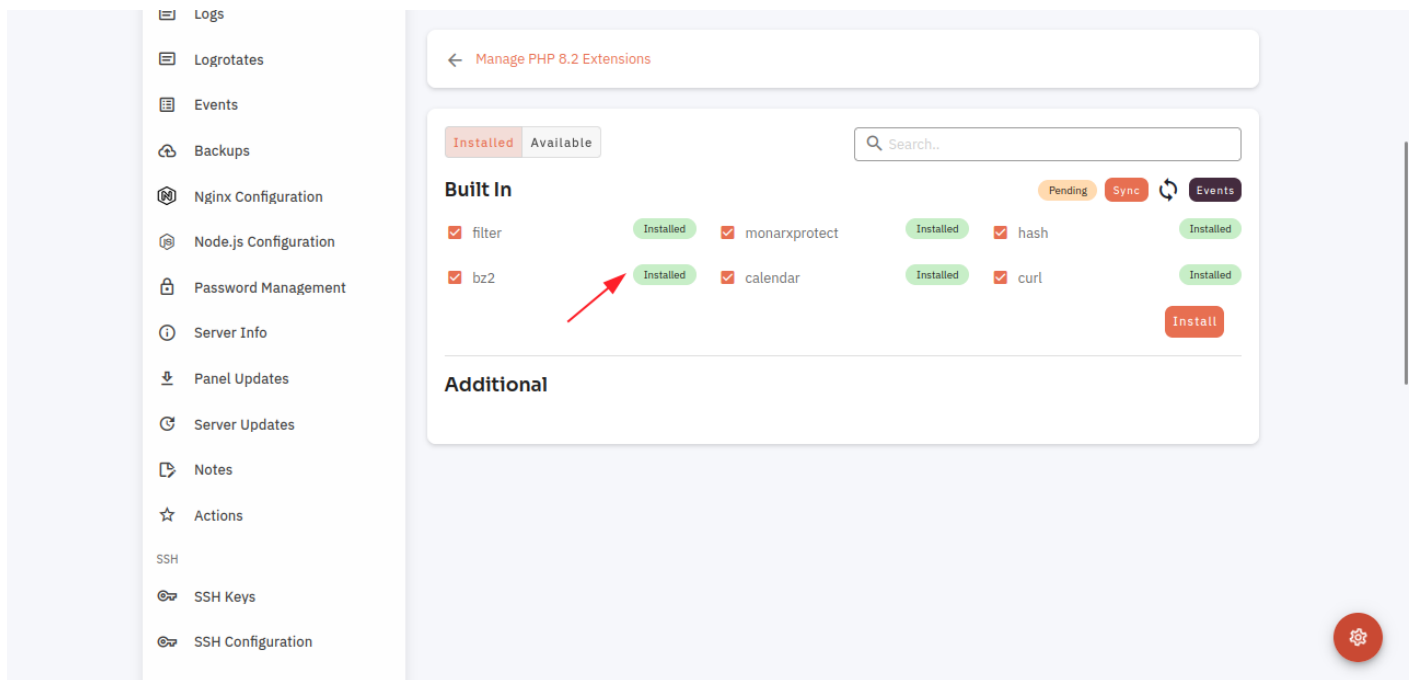

4. Select Extensions Option.

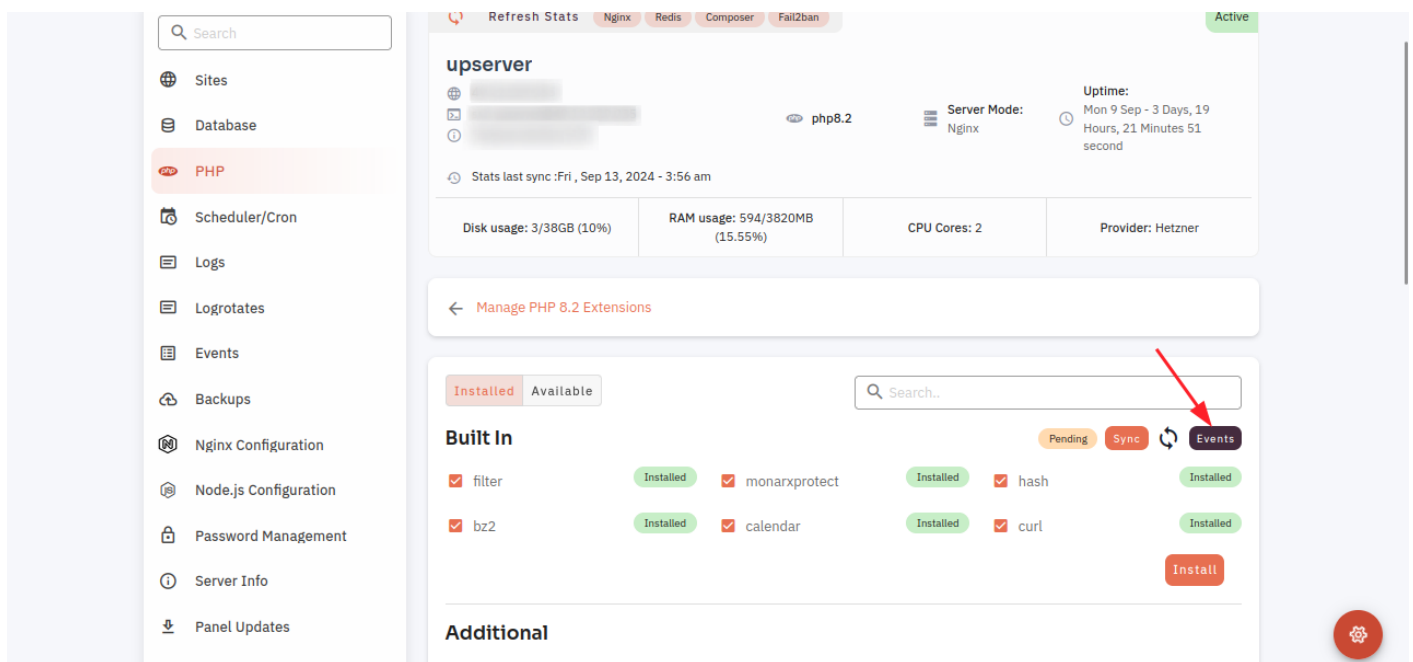

4. Click on the available button. Select extensions of your choice and click on the Save Button.

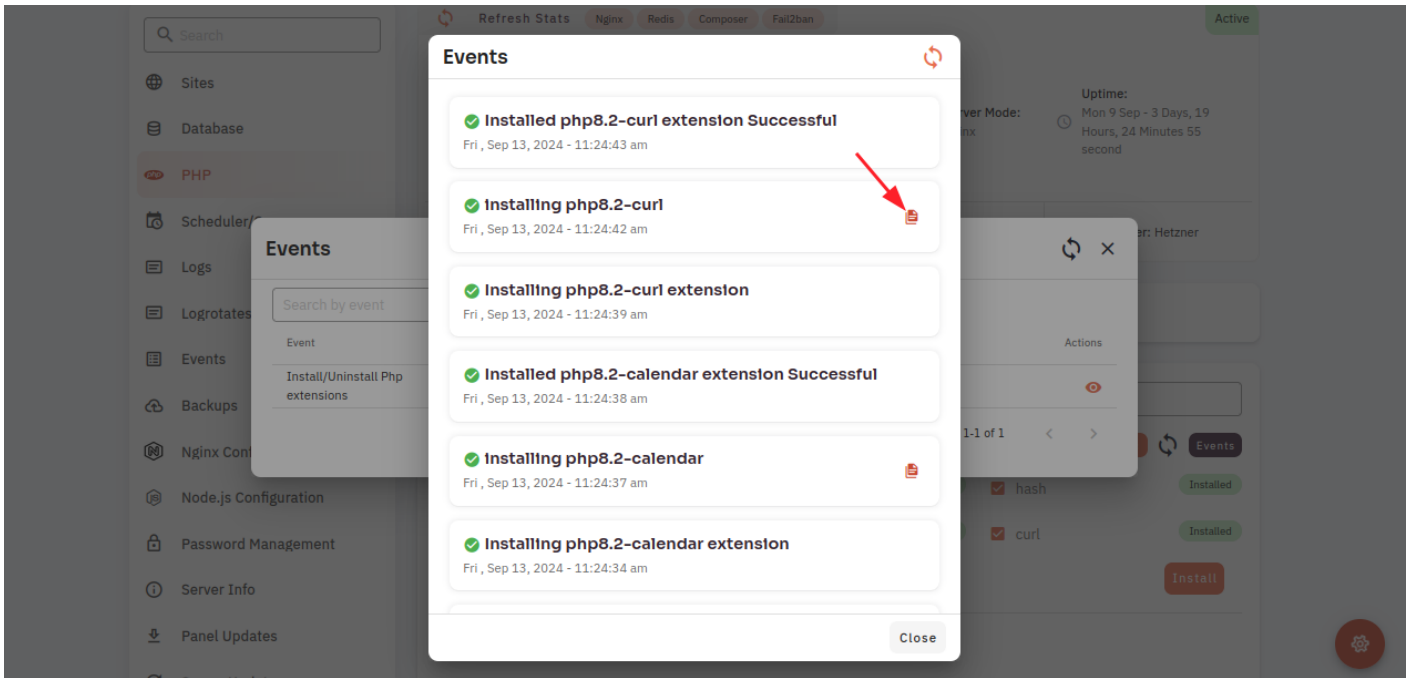

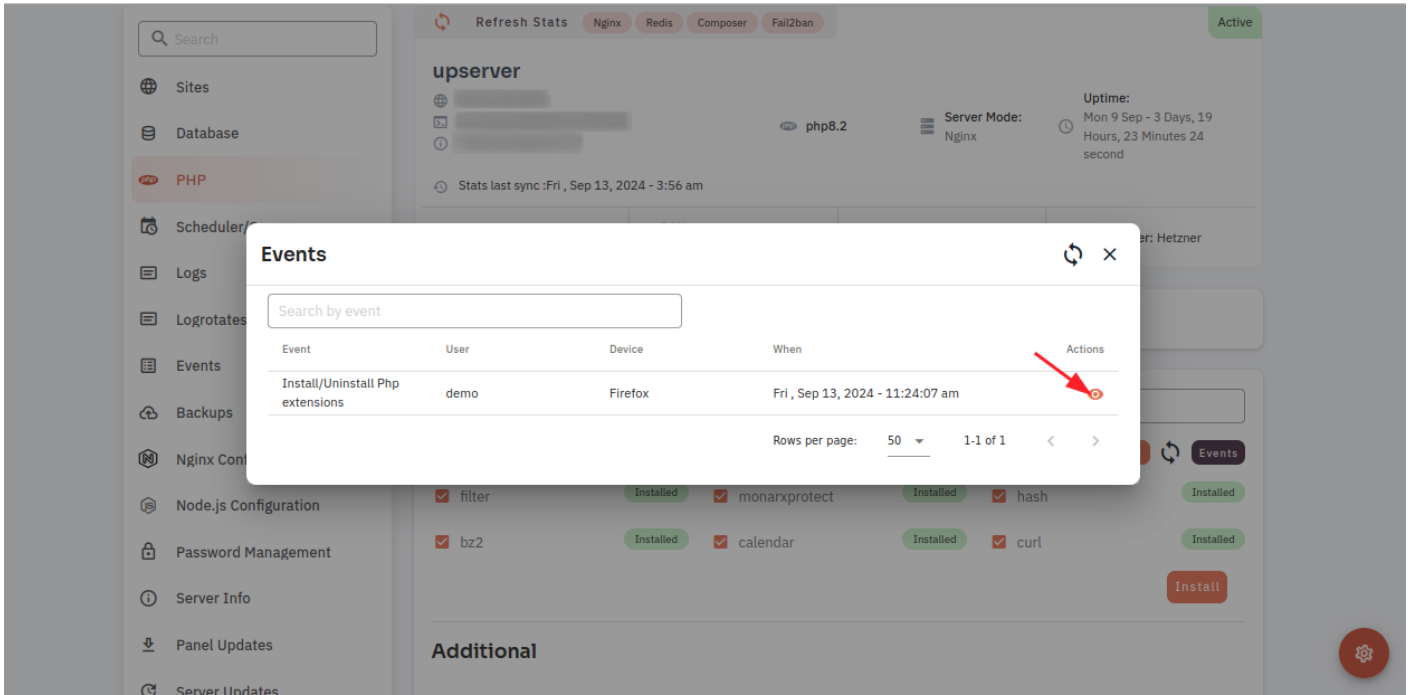

5. Here, you can see the list of extensions installed successfully.

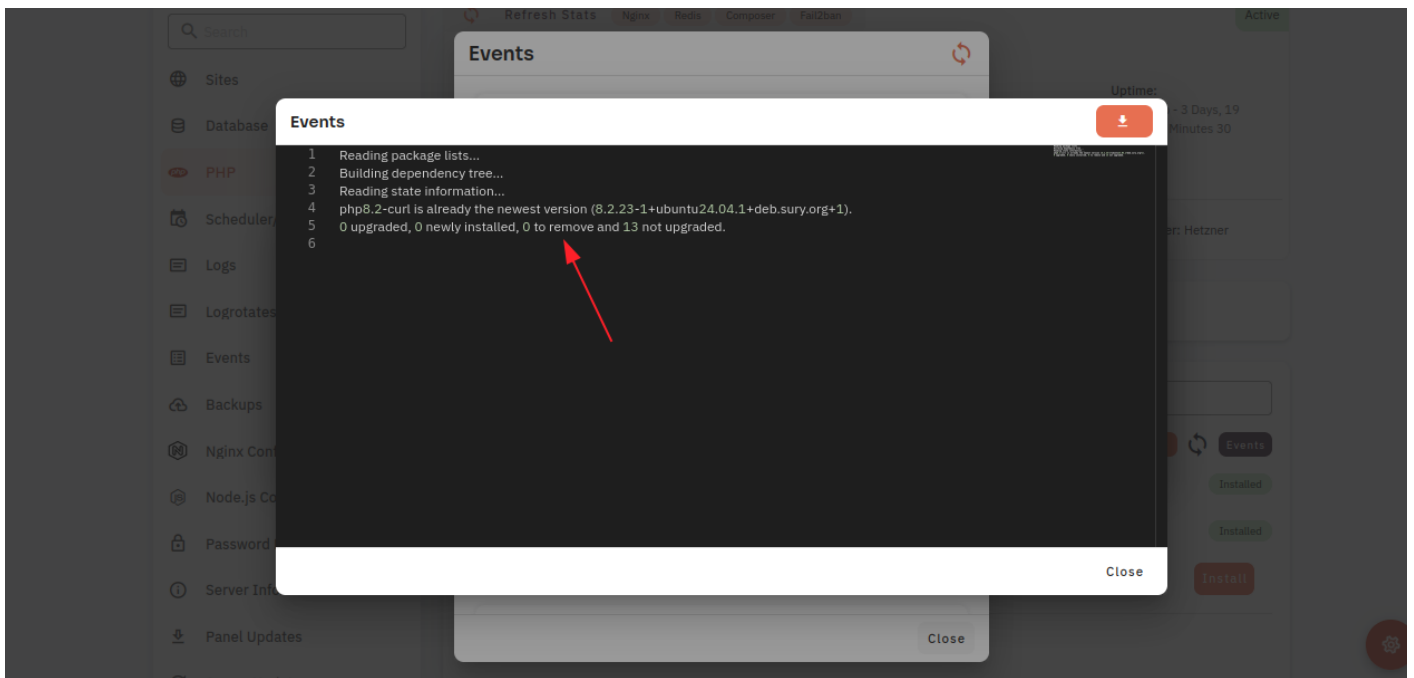

6. You can also check Events by clicking on the Events button.

7. Here, you can see a list of events. You can also check logs by clicking on the Eye icon.

Here, a log file will appear.
