

How to view SSH public key on server in CloudPanzer?

Follow the steps below to view the SSH public key

1: Once logged in, look for a "Server" and click on it.

2. Click on the SSH Key option.

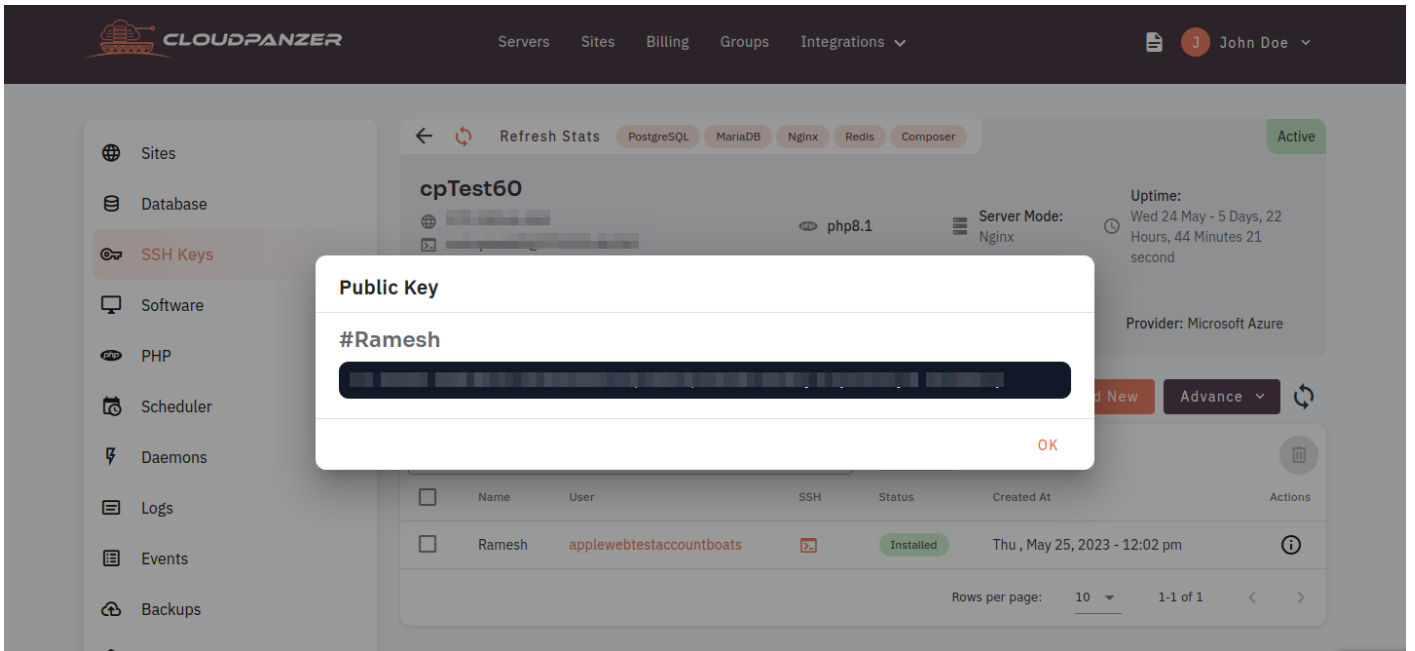

The screenshot shows the CloudPanzer dashboard. The left sidebar contains a list of navigation items: Sites, Database, SSH Keys (highlighted with a red box and a red arrow), Software, PHP, Scheduler, Daemons, Logs, Events, Backups, and Nginx Configuration. The main content area displays the 'cpTest60' server status, including its uptime, disk usage, RAM usage, CPU cores, and provider (Microsoft Azure). Below this, the 'SSH Keys' section shows a table with one key installed for the user 'Ramesh'.

Name	User	SSH	Status	Created At	Actions
	Ramesh	applewebtestaccountboats	Installed	Thu, May 25, 2023 - 12:02 pm	

3. Click on the view icon.

This screenshot is similar to the previous one, but with a red arrow pointing to the view icon (info icon) in the Actions column of the SSH Keys table. The view icon is located next to the 'Installed' status of the key for user 'Ramesh'.

4. Here you can see the public key has been shown successfully.
