

# Where you can see Referrals users list in CloudPanzer?

Referrals on a server are used to enhance performance, availability, and security. They distribute network traffic, balance loads across servers, and guide users to appropriate resources. Referrals also optimize data retrieval, support centralized authentication, and improve the overall user experience in distributed and complex server environments.

Follow the steps below to the Referrals users list

## **Navigate to the Account Setting**

## **Use this link to view How to Navigate**

3: Select the Referrals option.

The screenshot shows a user interface with a sidebar on the left and a main content area on the right. The sidebar contains a list of menu items: Profile, Change Password, Encryption Pin, Alerts, Activity, Company Details, Archived Servers, 2Fa Authentication, Sessions, Manage Integrations, Shell Aliases, SSH Keys, Actions, Referrals (highlighted with a red star and a red arrow), and Transfer Request Servers. The main content area is titled "Referrals (johnAN9)" and features a search bar and a table. The table has four columns: Name, Email, Status, and Date. It contains one row with the following data: Name: William, Email: william@testaccount.live, Status: Pending, Date: 12/15/2022 - 4:47 pm. Below the table, there is a pagination control showing "Rows per page: 10" and "1-1 of 1".

Referrals (johnAN9)

Search..

Name	Email	Status	Date
William	william@testaccount.live	Pending	12/15/2022 - 4:47 pm

Rows per page: 10 1-1 of 1 < >

You can view the list of referred users here.

This screenshot is similar to the one above, showing the "Referrals (johnAN9)" page. However, the red arrow now points to the first row of the table, specifically to the "Name" column where "William" is listed. The sidebar and the rest of the page content remain the same.

Referrals (johnAN9)

Search..

Name	Email	Status	Date
William	william@testaccount.live	Pending	12/15/2022 - 4:47 pm

Rows per page: 10 1-1 of 1 < >
